Small Groups. Studies in Social Interaction. D. by A. Paul Hare,... Edgar F. Borgatta,... Robert F. Bales,.... A. Paul Hare, Edgar F.. Borgatta, Robert F.. Bales, 1966 Lectures in Aerospace Medicine, 3-7 February 1964 USAF School of Aerospace Medicine, 1964 **Training Methodology: Background theory and research** National Communicable Disease Center (U.S.), 1969 **Socio-Cognitive Dynamics in Strategic Processes** Maren S. D. Breuer, 2010 Process related considerations in strategy research and approaches to managerial cognition constitute two highly valuable yet still only limitedly integrated fields of interest in strategic management To fill this void the work starts from a cognitive perspective with the overall aim of examining the emergence of organisational strategies in strategic processes The central research object strategy is thereby conceptualized as shared strategic orientations among an organisation s key actors The existing gap between strategy process research and cognitive strategy research is closed on a conceptual level first by developing and specifying a socio cognitive perspective on strategic processes In recognition of the central importance of social interactions in this context the focus is then set on a specific core forum for strategic activities i e strategic decision making groups In this the nature and the role of social interactions for the developing strategy related knowledge structures is examined first conceptually leading to the development of a socio cognitive model on strategic decision making in groups followed by a qualitative empirical study in this kind of activity forum With its truly interdisciplinary nature the dissertation is

of interest for strategy scholars as it enlarges the pool of knowledge in strategic management both content wise and also methodologically with the innovative empirical research approach adopted. For practitioners contributions are made by detailing the different dimensions of strategic processes and hence sensitizing to important factors for careful overall process designs. At the micro level concrete suggestions are derived for composing and instructing strategy teams in such a way as to allow for efficient interchanges during the discussions themselves as well as to enable the effectiveness of these efforts beyond the specific group context and for the performance of the wider organisation.

By the 1970s however the field had lost the interest of most social psychologists. *Theory and Research on Small Groups* reintegrates that work back into the mainstream of social psychology. The more recent issues oriented approach has not only resulted in many interesting findings it has also applied basic social psychological theory in new ways and moreover led to new theoretical developments that deserve more attention. This volume which features the work of esteemed researchers from around the world is a bountiful resource worthy of notice by all social psychologists.

The Handbook of Group Communication Theory and Research Lawrence R. Frey, Dennis Gouran, Marshall Scott Poole, 1999-07-08

The Handbook of Group Communication Theory and Research establishes a central resource for the field documenting and synthesizing the work done in group communication's 50 year history. With contributions from the most experienced and respected scholars in the field the editors Lawrence R. Frey, Dennis S. Gouran and Marshall Scott Poole present an overview of group communication study and examine a variety of theoretical positions and methodological practices. The volume is divided into six broad areas of communication scholarship: Foundations of group communication theory and research; Individuals and group communication; Task and relational group communication; Group communication processes; Group communication facilitation; Group communication contexts and applications. The sections serve as a crossroads where various paths pursued in each area meet, summarize and suggest new maps and roads that need to be followed in the future. Offering a comprehensive history of group communication theory and research and establishing new conceptual perspectives and research agendas for future group communication scholars, this important resource will be an unrivalled tool for scholars, researchers, educators, practitioners and students alike.
