Practicality is a living essence While some people thrive on extravagance and lavishness to be able to signify opulence and sense of worth some people regard this excess ridiculous It makes sense too One single person occupies a small space in the world why does he need a massive dwelling place Why the need for all the fluff when things can be kept simple There are basically two types of tiny houses with homes a little larger than others and the smallest of its kind that are less than 200 square feet To be included in this category a home has to be less than 1 000 square meters The concept of tiny houses appeal to many because too much is often overwhelming It is in the simplicity and straightforwardness of living that you get to appreciate life's intricate corners As a matter of fact if you take time to ask a tiny house owner he will tell you that the biggest lure is the craftiness when you're able to create something so brilliant it raises eyebrows that's the main satisfaction
