**Juxtaposition** Piers Anthony,2012-02-14 In this brilliantly satisfying conclusion to the epic adventure begun in *Split Infinity* and continued in *Blue Adept* Piers Anthony again proves himself a consummate master of both science fiction and fantasy Stile had problems two whole worlds of problems in fact On Proton a world of future science his murder was averted only by the help of a lovely robot who sent him through an invisible curtain to Phaze an alternate world ruled by magic There he found he was the double of the sorcerer the Blue Adept who had been mysteriously murdered And the assassin was after Stile To survive Stile had to master magic fight a dragon win the friendship of a lady unicorn locate his enemy among the paranoid Adepts and return out of Phaze to win the Great Games on Proton After that he was ready to face the real problems The infallible Oracle was suddenly involved in the conspiracy against him The two worlds were out of balance and heading for disaster Stile was somehow supposed to take over the job of saving them or go down to total destruction with all he loved he had to act and act quickly with no idea of what he was supposed to do      **The Mercy of Madness** William

Metamorphosis and Place Joshua Parker, Lucie Tunkrová, Mohamed Bakari, 2009 If personal and national identity is often constructed in terms of place how do our identities and values change as places themselves are transformed What happens to the spaces in which we live as societal values and identities change These questions can be asked of almost any discipline whether one is taking a photograph or mapping a literary topography tracing linguistic change in a geographic region or language TM s importance to our conception of a political territory building a house or place of worship on a physical plot of land or constructing them from words on a page or computer software Few places are ever uniquely our own We share them knowing that the geographic points stabilizing our own identities serve on their reverse side to support an entirely different set of meanings We project our cultural or disciplinary markers onto landscapes which are already hardly blank but full of others TM meanings This collection brings together scholars from a range of disciplines including literary and cultural studies history political science architecture anthropology photography and art history communications sociology lexicography linguistics tourism management and theoretical psychoanalysis each shedding light on how place is both a transforming subject and a transformed object
