Compendium of the World's Languages: Ladakhi to Zuni George L. Campbell, 2000 Many languages particularly those which have achieved literary status have been studied in great detail and specialized descriptions of these are plentiful What has not been so readily available however is a general survey covering a wide spectrum of the world's languages on a comparative basis It is this kind of comparative cross section of languages ranging from the familiar and well documented to the relatively obscure that the Compendium of the World's Languages presents *Forthcoming Books* Rose Arny, 1996-10

**Cantonese** Hugh Baker, 1995 Books Out Loud, 2007 *Intonational Morphology* John C. Wakefield, 2020-04-09 This book discusses the morphological properties of intonation building on past research to support the long recognized relationship between the functions and meanings of discourse particles and the functions and meanings of intonation The morphological status of intonation has been debated for decades and this book provides evidence from the literature combined with new and compelling empirical evidence to show that specific intonational forms correspond to specific segmental discourse particles Based on the conclusion that intonation is in the lexicon it proposes syntactic positions for intonational meanings using a cartographic approach It also describes how intonation is represented in speakers' minds which has important implications for first and second language acquisition as well as for theories and approaches to artificial speech recognition and production This book is of interest to theoretical and applied linguists as well as to anyone whose research and interests relate in any way to intonation
