On Teaching Foreign Languages Marcela Ruiz-Funes,2002-10-30 The author reports on a qualitative action research project on theories and practices in foreign language education The goal of the study was to

relate the knowledge of foreign language teaching learning and acquisition gained through research to the beliefs and experiences of expert foreign language teachers The four participating teachers represent real teachers who distinguish themselves from their peers for their excellence in teaching foreign languages and their success in serving as clinical teachers Four theoretical issues are discussed in detail the proficiency movement the role of input teaching language in context and class participation motivation and discipline These aspects were selected because 1 they pose major challenges to foreign language interns and 2 they play an essential role in the learning acquisition process of second language students The major contribution of this study is the integration of the theoretical and practical dimensions The practical aspect is presented by the expert foreign language teachers who describe in their own words how and explain why they implement a given foreign language theory in their classrooms This integration provides foreign language teachers with a realistic view of foreign language education and establishes a dialogue between the university and the school communities A significant number of excerpts from discussion interview sessions conducted with the teachers are included *Teaching is More Than Pedagogical Practice* Ilghiz M. Sinagatullin,2009 This book focuses on thirty three rules or principles that educators often fail to pay heed to in their professional activity These are rules that are vaguely articulated or even left unsaid when preparing contemporary teachers Teaching Is More Than Pedagogical Practice also helps teachers cope with a wide range of confusing and challenging situations Among other things the author recommends that educators have a good understanding of fundamental humanistic values have a special love and a tender affection for children with alternative behavior and alternative health know a child s genealogy beware of dishonesty toward children and adolescents avoid favoritism know children s learning styles avoid excessive experimenting with students treat each learner as his or her own child use means and techniques of folk pedagogy Curriculum-Based Professional Learning in Early Childhood Education: Conceptualization, Implementation and Evaluation Weipeng Yang,Alfredo Bautista,Hui Li,2023-08-22
