## **The Aging Enterprise:**

**The Aging Enterprise** Carroll L. Estes, 1979 Dr Carroll Estes has long been recognized as one of our most influential social gerontologists beginning with the publication of the *Aging Enterprise*. The process of aging over the life course is affected by biological and psychological factors but a sociological perspective makes an important contribution to our understanding of aging by explicating how social economic and political forces shape the aging experience. This book quickly achieved iconic status among gerontologists and other social scientists as one of the founding texts in critical gerontology.

*Aging Enterprise* Carroll L. Estes, 1979-05-01      *The Aging Enterprise. A Critical Examination of Social Policies and Services for the Aged* Carroll Lynn Estes, 1979      **The SAGE Handbook of Social Gerontology** Dale Dannefer, 2010-09-14

This volume reflects the emergence of ageing as a global concern including chapters by international scholars from Asia Australasia Europe and North America. It provides a comprehensive overview of key trends and issues in the field drawing upon the full range of social science disciplines. The Handbook is organized into five parts each exploring different aspects of research into social aspects of ageing. Disciplinary overviews summaries of findings from key disciplinary areas within social gerontology. Social relationships and social differences topics include social inequality gender and ageing the role of religion inter generational ties social networks and friendships in later life. Individual characteristics and change in later life chapters in this section examine different aspects of individual aging including self and identity cognitive processes and biosocial interactions and their impact on physical and psychological aging. Comparative perspectives and cultural innovations topics in this section include ageing and development ageing in a global context migration and cross cultural perspectives on grandparenthood. Policy issues. The final section examines some of the main policy concerns affecting older people across the world. Topics include developments in social policy long term care technology and older people end of life issues work and retirement crime and older people and the politics of old age. This will be essential reading for all students researchers and policy makers concerned with the major issues influencing the lives of older people across the globe.

**No Aging in India** Lawrence Cohen, 1998-07-30 From the opening sequence in which mid nineteenth century Indian fishermen hear the possibility of redemption in an old woman's madness *No Aging in India* captures the reader with its interplay of story and analysis. Drawing on more than a decade of ethnographic work Lawrence Cohen links a detailed investigation of mind and body in old age in four neighborhoods of the Indian city of Varanasi Banaras with events and processes around India and around the world. This compelling exploration of senility encompassing not only the aging body but also larger cultural anxieties combines insights from medical anthropology psychoanalysis and postcolonial studies. Bridging literary genres as well as geographic spaces Cohen responds to what he sees as the impoverishment of both North American and Indian gerontologies the one mired in ambivalence toward demented old bodies the other insistent on a dubious morality tale of modern families breaking up and abandoning their elderly. He shifts our attention irresistibly toward how old age comes to

matter in the constitution of societies and their narratives of identity and history *Social Policy and Aging* Carroll L. Estes, 2001-03-30 This groundbreaking book provides comprehensive treatment of the political economy of aging by a scholar widely credited as the founder and key thinker of this field in the US and internationally The body of work presented in this volume in developing this critical perspective aims to contribute to the understanding of old age and aging in the context of problems and issues of the larger social order in the world's most advanced capitalist nation the U S A Since Estes first writing on the political economy of aging in 1979 there has been growing recognition and incorporation of her critical perspective as one of the major paradigms in the field of aging

**Fiscal Austerity and Aging** Carroll L. Estes, 1983-07 The authors draw on the work they have done for a major research centre in order to assess both the shifts in policy towards the elderly which have been wrought by the austerity politics of the 1980s and the likely long term impact of such changes The views taken of older people the history of public policy toward the aged the shifting responsibility between state and federal government are discussed
