the executive manager or supervisor an overview and understanding of what the Shingo experience entails The main purpose of this book It is for the executives who want to understand their role in supporting and leading middle management with its implementation Many executives from developing countries all over the world are seeking a concise definition of what the Shingo model is and this book functions as the perfect primer Even those who have attended and implemented the lessons from the Shingo Institute s courses would find this book a benefit as it serves perfectly as backup and reference material In addition this book helps anyone who has started their journey with the Shingo model and may be confused about what to do and expect It gives them a vision of what the continuing journey will look like The Shingo process is being taught at numerous universities and this book could indeed serve as the appropriate textbook or supplemental reading Essentially this book teaches an innovative and extremely successful approach to continuous improvement referred to as the Shingo process It is based on a set of universally accepted principles that are endorsed by improvement leaders such as Covey and companies such as Toyota This book is not a detailed review or a replacement of the Shingo workshops It is an overview of the entire Shingo process starting with a discussion of the challenges that many of today's enterprises are experiencing The author in his role as a PhD in economics has studied industries and has worked closely with many of them attempting to understand their weaknesses This book builds upon an understanding of these weaknesses The book discusses how the over all Shingo methodology fits into these organizations and highlights the benefits The next step is then to discuss what requirements are necessary for an organization to get ready for a Shingo transformation What are the steps that the organization needs to go through and when will it know that it is ready to begin The book briefly reviews the Shingo Insights and Principles and explains how the Shingo courses should be best utilized to facilitate the desired transformation It suggests some alternative plans for over all implementation based on the current state of the enterprise It explains why there is no one way for successful implementation and how the implementation sequence needs to be customized It also discusses the length of time needed for success and how this differs depending on the current enterprise environment Lastly the book explains how the implementation and Shingo training is never finished It is an on going process and success is defined by internal improvements not by some arbitrary external benchmark The book is intended to be educational thought provoking entertaining in its stories and examples and a guideline towards the development of a plan for continuous improvement This book is filled with stories and examples showing successful and not so successful implementations The stories are used to highlight many of the pitfalls that have arisen and may arise for you and which can be avoided if the reader is aware of them and knows how to watch for them

Driver Education for Safety in Adverse Driving Conditions Jonathan Skolnik,2008 Under certain adverse driving conditions often times the driver of a vehicle has inadequate training or education and ends up taking wrongful action leading to severe crashes The purpose of this research was to determine the state of the art practices in educating drivers for safety in certain adverse driving conditions and to develop a realistic module of a driver education program addressing that topic In addition the research sought to determine whether any relevant laws and regulations related to driving in the State of Arizona need to be changed in order to properly address safety under adverse driving conditions The study consisted of four main tasks which included a literature review statistical analysis of Arizona crash data a survey of other states regarding their driver education programs and targeted case studies of selected states and other private or semi government agencies involved in driver education curriculum development and implementation It is the recommendation of this report that Arizona continue its on going efforts to convene a driver education task force consisting of both Arizona Department of Education and Motor Vehicle Department representatives with the goal of developing uniform standards for both driver education curriculum and training for driver education instructors to apply to both the public school driver education program and the professional driver training schools In addition because Arizona does not have an

existing state level driver education curriculum the state should adopt a complete driver education curriculum as opposed to a module geared towards adverse driving conditions That said should that effort not be possible it is the recommendation of this report that one of the two adverse conditions related modules Montana or Texas Virginia Both of these modules are well designed and thorough and both would serve Arizona well They are similar in their coverage of adverse driving conditions The choice between the two would come down to Arizona s preference between the NIDB model with which the Montana curriculum is more closely aligned and the ADTSEA model with which the Virginia Texas module is more closely aligned
