**Your Forces And How To Use Them (Annotated Edition)** Christian D. Larson, 2012 There are a million energies in man. What may we not become when we learn to use them all? This is the declaration of the poet, and though poetry is usually inspired by transcendental visions and therefore more or less impressed with apparent exaggerations, nevertheless there is in this poetic expression far more actual practical truth than we may at first believe. How many energies there are in man, no one knows, but there are so many that even the keenest observers of human activity have found it impossible to count them all. And as most of these energies are remarkable to say the least, and some of them so remarkable as to appear both limitless in power and numberless in possibilities, we may well wonder what man will become when he learns to use them all. It is the purpose of this book, not only to discuss these greater powers and possibilities in man, but also to present practical methods through which they may be applied. This is the annotated edition, including an essay about the author and the New Thought Movement in Cincinnati which he founded.      *Healing Yourself*
