Kokka ,1916 Race and the Animated Bodyscape Francis M. Agnoli,2023-04-21 Race does not exist in animation it must instead be constructed and ascribed Yet over the past few years there has been growing discourse on the intersection of these two subjects within both academic and popular circles In Race and the Animated Bodyscape Constructing and Ascribing a Racialized Asian Identity in Avatar and Korra author Francis M Agnoli introduces and illustrates the concept of the animated bodyscape looking specifically at the US television series Avatar The Last Airbender and its sequel The Legend of Korra Rather than consider animated figures as unified wholes Agnoli views them as complexes of signs made up of visual aural and narrative components that complement contradict and otherwise interact with each other in the creation of meaning Every one of these components matters as they are each the result of a series of creative decisions made by various personnel across different production processes This volume re constructs production narratives

for Avatar and Korra using original and preexisting interviews with cast and crew members as well as behind the scenes material Each chapter addresses how different types of components were generated tracing their development from preliminary research to final animation In doing so this project identifies the interlocking sets of production communities behind the making of animation and thus behind the making of racialized identities Due to its illusory and constructed nature animation affords untapped opportunities to approach the topic of race in media looking beyond the role of the actor and taking into account the various factors and processes behind the production of racialized performances The analysis of race and animation calls for a holistic approach one that treats both the visual and the aural as intimately connected This volume offers a blueprint for how to approach the analysis of race and animation

The History of Art in Wei, Jin, Southern and Northern Dynasty Li Shi, The book is the volume of The History of Art in Wei Jin Southern and Northern Dynasty among a series of books of Deep into China Histories The earliest known written records of the history of China date from as early as 1250 BC from the Shang dynasty c 1600 1046 BC and the Bamboo Annals 296 BC describe a Xia dynasty c 2070 1600 BC before the Shang but no writing is known from the period The Shang ruled in the Yellow River valley which is commonly held to be the cradle of Chinese civilization However Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River These Yellow River and Yangtze civilizations arose millennia before the Shang With thousands of years of continuous history China is one

of the world's oldest civilizations and is regarded as one of the cradles of civilization. The Zhou dynasty (1046–256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature, and philosophy first developed during those troubled times. In 221 BC, Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death and was supplanted by the longer-lived Han dynasty (206 BC–220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men well-versed in calligraphy, history, literature, and philosophy were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644–1912), which was replaced by the Republic of China in 1912 and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace and periods of war and failed statehood, the most recent being the Chinese Civil War (1927–1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China; in some eras, control stretched as far as Xinjiang and Tibet, as at present. Traditional culture and influences from other parts of Asia and the Western world, carried by waves of immigration, cultural assimilation, expansion, and foreign contact, form the basis of the modern culture of China.
