## **The Death Gene:**

**The Death Gene** George J. Brewer, 2002-04-29 As most everyone who reads the newspapers these days will be aware DNA technology and cloning genes isolating and obtaining the DNA for a specific gene is on the cutting edge of science Almost every week a new gene is cloned its DNA sequence determined and its function discovered Discoveries of genes that cause specific diseases even some cancers such as breast cancer are being made on a regular basis The gene that is discovered in the present story is at present fictional It is a gene that promotes the aging process and therefore it promotes death The flip side of the gene is that if its action is turned off by a new drug as it is in the story it stops aging and allows an unlimited life span Neither the discovery of such a gene or its manipulation by a drug are at all far fetched In fact it can be anticipated that such a gene probably will be discovered sooner or later This is a story about what happens when such a gene and a way to turn it off are discovered

**Story Line** It all started with something seemingly trivial the interruption of the usual behavior of the pet mice in Dr Al Grogans laboratory A world class physician scientist in his mid fifties Grogan has been spending long evenings in his lab and office trying to solve a riddle Why had one of his discoveries a promising new long acting contraceptive called DNA C129 quit working The unusual squeaks and sounds of protest from the mice interrupted Grogans concentration The reason the mice are disturbed is obvious Maria Grogans new lab assistant an attractive lady in her late thirties has disturbed the mice by peering closely at them Initially disgruntled at the interruption Grogan nevertheless demonstrates to Maria a trick he had taught the mice Maria asks about the age of the mice and Grogan says theyre maybe four years old since they were part of the original DNA C129 experiments Maria who has had considerable experience studying mouse aging contradicts her boss saying that mice of this strain simply dont live that long In human terms they would be the equivalent of two hundred years old Grogan who now realizes he isnt very well informed about mouse life span tells Maria he was probably mistaken about the age of the mice But he knows they are really about four years old and his mind starts churning excitedly about some of the possible effects of DNA C129 and about the reason it may have stopped working With this new clue things begin to snap into place in Grogans mind DNA C129 had quit working when he had lost his junior partner a younger man named Bowdler who had been carrying out the actual experiments under Grogans general supervision Bowdler had been killed in an auto accident Grogan now realizes that DNA C129 has antiaging properties and probably owes its long lasting effects to Bowdler doing an outlaw experiment namely using an illegal vector the viral like particle that delivers the therapy DNA one that had not been authorized by Grogan The keys to DNA C129 effects including its antiaging effects no doubt lay not only in its own innate properties but in the vector Bowdler had used With Bowdlers death and with Grogan now using the standard vector DNA C129 had lost its properties in Grogans experiments During the next four months the Grogan lab becomes a beehive of activity as Grogan sets out to test these ideas As the work goes on a romance develops between Grogan and Maria However Grogan is very secretive about the purpose of

the experiments even with Maria He works for a modest sized biotech company in Madison Wisconsin called DNA Unlimited and he doesn't trust management He codes all the results and mixes up the experiments in such a manner that no single technician has a complete picture of the studies and the results During this time Grogan places regular calls to a former student and current best friend Kirk Starge *The Death Gene* Malcolm Rose,2006 When Karl and Finn find themselves in possession of a notebook they discover it contains a scientist's top secret research into creating new living species from scratch Although initially developed for environmental improvement the research can also be used as a highly dangerous weapon and Karl and Finn are plunged into a nightmare which is spiralling out of control **California.
