The Rape Victim:

The Rape Victim Elaine Hilberman Carmen,1976 **The Victim of Rape** Lynda Lytle Holmstrom,2017-09-29 This unprecedented in depth account of how our major institutions respond to the crime of rape is the first empirical study of rape victims in the United States as they come into contact with those who staff our police stations hospitals and courthouses As this engrossing study makes clear rape does not end with the assailant s departure the profound suffering of the victim can be diminished or heightened by the response of these institutions The authors provide direct on the scene reports of how rape victims confront and endure the often devastating effects of institutional processing Their work is based on first hand observations personal interviews and case histories that document the rape victim s plight and includes tables that present all research findings in easy to grasp numerical terms The authors note changes now taking place and argue that further institutional changes must be made to delegitimize rape in our society The new introductory essay locates The Victim of Rape within the context of four lines of research studies looking at the criminal justice system processing of such cases the connection of rape to everyday life social structural and ideological support for rape and strategies for prevention

Framing the Rape Victim Carine M. Mardorossian,2014-05-13 In recent years members of legal law enforcement media and academic circles have portrayed rape as a special kind of crime distinct from other forms of violence In Framing the Rape Victim Carine M Mardorossian argues that this differential treatment of rape has exacerbated the ghettoizing of sexual violence along gendered lines and has repeatedly led to women s being accused of triggering if not causing rape through immodest behavior comportment passivity or weakness Contesting the notion that rape is the result of deviant behaviors of victims or perpetrators Mardorossian argues that rape saturates our culture and defines masculinity s relation to femininity both of which are structural positions rather than biologically derived ones Using diverse examples throughout Mardorossian draws from Hollywood film and popular culture to contemporary women s fiction and hospitalized birth emphasizing that the position of dominant masculinity can be occupied by men women or institutions while structural femininity is a position that may define and subordinate men minorities and other marginalized groups just as effectively as it does women Highlighting the legacies of the politically correct debates of the 1990s and the terrorist attacks of 9 11 the book illustrates how the framing of the term victim has played a fundamental role in constructing notions of agency that valorize autonomy and support exclusionary especially masculine models of American selfhood The gendering of rape including by well meaning sometimes feminist voices that claim to have victims best interests at heart ultimately obscures its true role in our culture Both a critical analysis and a call to action Framing the Rape Victim shows that rape is not a special interest issue that pertains just to women but a pervasive one that affects our society as a whole [The Rape Crisis Intervention Handbook](#) S.L. McCombie,2012-12-06 This handbook is intended to be a comprehensive resource for those involved in providing crisis intervention to rape victims The medical legal and counseling needs of the rape victim are presented to

prepare helping professionals to offer sensitive and skillful assistance to women who have suffered sexual assault The interdisciplinary thrust of the book reflects our conviction that health professionals police and prosecuting attorneys must share their expertise and coordinate their efforts in order to successfully meet the multiple needs of rape victims and their families While an extensive literature on rape has developed in the past decade to the best of our knowledge there is no single source for the practical treatment oriented information sought by those who work directly with victims The primary objective of this book is to offer just such a guide to service providers The book is organized into sections that deal with a specific area of the treatment of victims Detailed guidelines are provided for the nursing medical counseling police and legal services involved in comprehensive crisis intervention Interdisciplinary teaming and the emotional impact of rape on service providers are discussed by authors actively involved in rape crisis work Rape laws are explained and court preparation for victim witnesses is carefully outlined Of particular relevance to counselors is an overview of crisis theory and a psychodynamic perspective on rape trauma
