The Scientific Case Against Smoking:

The Scientific Case Against Smoking Ruth Winter, 1980 Documents the physiological effects of smoking how smoking becomes addictive and how it damages the health of smoker and non smoker alike

Unlucky Strike: Private Health and the Science, Law and Politics of Smoking John Staddon, David Hockney, 2014-01-10 Remember fifty years ago when everyone smoked Since tobacco found its way into Europe in the sixteenth century smoking has been a controversial issue Fifty years ago almost everyone smoked and fifty years before that smokers were in the doghouse up until the early twentieth century cigarettes were illegal in a number of U S states Needless to say smoking has always been a ready source of revenue It has also been a source of health concerns both real and imagined This mixture of pleasure money and risk that comes with the act of smoking means that it s rarely treated fairly by politicians health professionals or the public Nowadays tough anti smoking laws are to be obeyed in most corners of the globe The misinformation about and unreasoning hostility directed at smoking and smokers is one of the major concerns of this book After all smoking has no public cost Isn t it just the individual smokers who are at risk Prompted by this burgeoning fascination Staddon looks further into the facts And the more he looks the weaker the case against smoking as a public health issue becomes Is ETS really dangerous to children And if so how can science prove it And if smoking has no public cost and the medical case for third party harm is weak why are smokers still being victimised In this provocative thought provoking book Staddon is determined to uncover the truth about smoking But the truth s not always pretty

Up in Smoke Martha A. Derthick, 2011-07-26 Now with a brand new 3rd edition the book returns to ordinary politics and the passage of the Family Smoking Prevention and Tobacco Control Act which gave the FDA broad authority to regulate both the manufacture and marketing of tobacco products Derthick shows our political institutions working as they should even if slowly with partisanship and interest group activity playing their part in putting restraints on cigarette smoking

Tobacco Control Policy in the Netherlands Marc C. Willemsen, 2018-05-15 Governments have known since the 1960s that smoking results in irreversible health damage This open access book examines why governments have done so little to combat this when they have been aware of the problem and its solutions for decades What are the strategies and decisions that make a difference given that policy environments are often not conducive to change Taking the Netherlands as an example this book helps to understand the complex policy process at the national level and why it so often appears irrational to us It is the most sophisticated analysis of tobacco control policy to date applying insights from political sciences to the field of tobacco control

Reproducing Persons Laura M. Purdy, 2018-09-05 The essays next look at abortion from a variety of angles One contends that killing fetuses is not murder others emphasize the moral importance of access to abortion Purdy considers the conflicting interests of women and men regarding abortion and argues against requiring a husband s consent The book concludes with a consideration of new reproductive technologies and arrangements including the controversial issue of surrogacy or contract pregnancy Throughout Purdy combines traditional utilitarianism with some
