the modern concept so the sources cannot be considered entirely reliable Later Greek sources both historiographical and mythological can help fill in some more details but those sources are suspect because they were written several centuries after the emergence of the Sea Peoples Modern archaeology is beneficial in determining how people lived and possibly where they moved but there are also problems when one relies too much on archaeological data because the dating of material culture is not an exact science Finally linguistic evidence is often employed to determine the geographic origins and eventual landing points of many of the Sea Peoples but confusion often arises if a group's demonym refers specifically to their place of origin or final home Naturally the mystery surrounding the Sea Peoples has led to all kinds of theories aiming to identify them While plenty of theories are plausible there are other fanciful theories that have attempted to associate the Sea Peoples with the Atlantic Ocean and even Troy
