Token Economy:

The Token Economy Alan Kazdin, 2012-12-06 Applications of operant techniques in treatment and education have proliferated in recent years. Among the various techniques, the token economy has been particularly popular. The token economy has been extended to many populations included in psychiatry, clinical psychology, education, and the mental health fields in general. Of course, merely because a technique is applied widely does not necessarily argue for its efficacy. Yet the token economy has been extensively researched. The main purpose of this book is to review, elaborate, and evaluate critically research bearing on the token economy. The book examines several features of the token economy, including the variables that contribute to its efficacy, the accomplishments, limitations, and potential weaknesses, and recent advances. Because the token economy literature is vast, the book encompasses programs in diverse treatment, rehabilitation, and educational settings across a wide range of populations and behaviors. Within the last few years, a small number of books on token economies have appeared. Each of these books describes a particular token economy in one treatment setting, details practical problems encountered, and provides suggestions for administering the program. This focus is important but neglects the extensive scholarly research on token economies. The present book reviews research across diverse settings and clients. Actually, this focus is quite relevant for implementing token economies because the research reveals those aspects and treatment variations that contribute to or enhance client performance.

The Individual in the Economy S. E. G. Lea, Roger M. Tarpy, Paul M. Webley, 1987-04-24 The Individual in the Economy presents interesting analyses of important human behaviours.

Encyclopedia of Behavior Modification and Cognitive Behavior Therapy Michel Hersen, 2005-01-25 The three-volume Encyclopedia of Behavior Modification and Cognitive Behavior Therapy provides a thorough examination of the components of behavior modification, behavior therapy, cognitive behavior therapy, and applied behavior analysis for both child and adult populations in a variety of settings. Although the focus is on technical applications, entries also provide the historical context in which behavior therapists have worked, including research issues and strategies. Entries on assessment, ethical concerns, theoretical differences, and the unique contributions of key figures in the movement, including B. F. Skinner, Joseph Wolpe, Aaron T. Beck, and many others, are also included. No other reference source provides such comprehensive treatment of behavior modification, history, biography, theory, and application.

Thematic Coverage The first of the thematic volumes covers Adult Clinical Applications. Adults are the most common population encountered by researchers, clinicians, and students, and therefore more than 150 entries were needed to cover all necessary methods. The second volume covers Child Clinical Applications in 140 entries. One especially useful aspect of this volume will be the complications sections addressing what can go wrong in working with children. This is an area often overlooked in journal articles on the subject. Volume III, Educational Applications, addresses a range of strategies and principles of applied behavior analysis, positive behavior support, and behavior modification and therapy. These entries focus on classroom and school contexts in which the

instructional and behavioral interactions between teachers and their learners are emphasized Unique Easy to Follow Format Each of the volumes entries address a full range of mental health conditions and their respective treatments with the aim of providing systematic and scientific evaluation of clinical interventions in a fashion which will lend itself to the particular style of treatment common to behavior modification Major entries for specific strategies follow a similar format 1 Description of the Strategy 2 Research Basis 3 Relevant Target Populations and Exceptions 4 Complications 5 Case Illustration 6 Suggested Readings 7 Key Words Biographical sketches include the following 1 Birthplace and Date 2 Early Influences 3 Education History 4 Professional Models 5 Major Contributions to the Field 6 Current Work and Views 7 Future Plans Readership This encyclopedia was designed to enhance the resources available to students scholars practitioners and other interested social science readers The use of in text citations jargon and descriptions of research designs and statistics has been minimized making this an accessible comprehensive resource for students and scholars alike Academic and research librarians in the social sciences health and medicine will all find this an invaluable addition to their collections Key Features Three thematic volumes and over 430 total entries Five anchor articles in each volume provide context on major issues within the field Key words and lists of suggested readings follow each entry Contributions by internationally renowned authors from England Germany Canada Australia New Zealand and the United States Volume Editors Volume I Adult Clinical Applications Michel Hersen Johan Rosqvist Pacific University Volume II Child Clinical Applications Alan M Gross Ronald S Drabman University of Mississippi Volume III Educational Applications George Sugai Robert Horner University of Oregon Advisory Board Thomas M Achenbach Ph D Department of Psychiatry University of Vermont Stewart W Agras M D Department of Psychiatry Behavioral Science Stanford University School of Medicine David H Barlow Ph D ABPP Center of Anxiety and Related Disorders Boston University Alan S Bellack Ph D ABPP Department of Psychiatry University of Maryland School of Medicine Edward B Blanchard Ph D Department of Psychology University of Albany SUNY James E Carr Ph D Department of Psychology Western Michigan University Anthony J Cuvo Ph D Rehabilitation Institute Southern Illinois University Gerald C Davison Ph D Department of Psychology University of Southern California Eric F Dubow Ph D Psychology Department Bowling Green State University Rex L Forehand Ph D Psychology Department University of Vermont Arnold A Lazarus Ph D ABPP Center for Multimodal Psychological Services Robert P Liberman M D Department of Psychiatry West Louisiana VA Medical Center Scott O Lilienfeld Ph D Department of Psychology Emory University Marsha M Linehan Ph D ABPP Department of Psychology University of Washington Nathaniel McConaghy DSc M D School of Psychiatry University of N S W Australia Rosemary O Nelson Gray Ph D Department of Psychology University of North Carolina Greensboro Lars G ran st Ph D Department of Psychology Stockholms Universitet Sweden Alan D Poling Ph D Department of Psychology Western Michigan University Wendy K Silverman Ph D Department of Psychology Florida International University Gail Steketee Ph D School of Social Work Boston University Douglas W Woods Ph D Department of Psychology University of Wisconsin Milwaukee *Abnormal*
