## **Tonguing The Zeitgeist:**

**Tonguing the Zeitgeist** Lance Olsen,1994 In the not too distant future musicians are forced to sell their souls to MTV and take on a glitzy media image to have a chance at stardom [Theories of Forgetting](#) Lance Olsen,2014-02-28 Theories of Forgetting is concerned with how words matter the materiality of the page and how a literary work might react against mass reproduction and textual disembodiment in the digital age right from its use of two back covers one upside down and one right side up that allow the reader to choose which of the novel's two narratives to privilege Theories of Forgetting is a narrative in three parts The first is the story of Alana a filmmaker struggling to complete a short documentary about Robert Smithson's famous earthwork The Spiral Jetty located where the Great Salt Lake meets the desert Alana falls victim to a pandemic called The Frost whose symptoms include an increasing sensation of coldness and growing amnesia The second involves Alana's husband Hugh owner of a rare and used bookstore in Salt Lake City and his slow disappearance across Jordan while on a trip both to remember and to forget Alana's death The third involves marginalia added to Hugh's section by his daughter Aila an art critic living in Berlin Aila discovers a manuscript by her father after his disappearance and tries to make sense of it by means of a one-sided dialogue with her brother Lance Each page of the novel is divided in half Alana's narrative runs across the top of the page from back to front while Hugh's and his daughter's tale runs upside down across the bottom of the page from front to back How a reader initially happens to pick up Theories of Forgetting determines which narrative is read first and thereby establishing the reader's meaning making of the novel [An Informal History of the Hugos](#) Jo Walton,2018-08-07 Engaged passionate and consistently entertaining this is a book for those who enjoyed Walton's previous collection of essays from Tor.com the Locus Award winning What Makes This Book So Great The Hugo Awards named after pioneer science fiction publisher Hugo Gernsback and voted on by members of the World Science Fiction Society have been given out since 1953 They are widely considered the most prestigious award in science fiction Between 2010 and 2013 Jo Walton wrote a series of posts for Tor.com surveying the Hugo finalists and winners from the award's inception up to the year 2000 Her contention was that each year's full set of finalists generally tells a meaningful story about the state of science fiction at that time Walton's cheerfully opinionated and vastly well informed posts provoked valuable conversation among the field's historians Now these posts lightly revised have been gathered into this book along with a small selection of the comments posted by SF luminaries such as Rich Horton Gardner Dozois and the late David G Hartwell *The Routledge Companion to Experimental Literature* Joe Bray,Alison Gibbons,Brian McHale,2012-07-26 What is experimental literature How has experimentation affected the course of literary history and how is it shaping literary expression today Literary experiment has always been diverse and challenging but never more so than in our age of digital media and social networking when the very category of the literary is coming under intense pressure How will literature reconfigure itself in the future The Routledge Companion to Experimental Literature maps this expansive and multifaceted

field with essays on the history of literary experiment from the beginning of the twentieth century to the present the impact of new media on literature including multimodal literature digital fiction and code poetry the development of experimental genres from graphic narratives and found poetry through to gaming and interactive fiction experimental movements from Futurism and Surrealism to Postmodernism Avant Pop and Flarf Shedding new light on often critically neglected terrain the contributors introduce this vibrant area define its current state and offer exciting new perspectives on its future This volume is the ideal introduction for those approaching the study of experimental literature for the first time or looking to further their knowledge

Science Fact and Science Fiction Brian Stableford,2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed
