Temporal Points of View Margarita Vázquez Campos, Antonio Manuel Liz Gutiérrez,2015-08-14 This book seeks to arrive at a better understanding of the relationships between the objective and subjective aspects of time It discusses the existence of fluent time a controversial concept in many areas from philosophy to physics Fluent time is understood as directional time with a past a present and a future We

experience fluent time in our lives and we adopt a temporal perspective in our ways of knowing and acting Nevertheless the existence of fluent time has been debated for both philosophical and scientific reasons thus creating a rift between the subjective and objective aspects of time Starting from the basic notion of points of view or perspectives this book explores the relationships between objective or external time as it has been conceptualized by science and subjective or internal time which is involved in our lived experiences It establishes a general framework encompassing the nature structure and mode of existence of points of view in which the objective and subjective aspects of time can be integrated The book mainly addresses researchers and postgraduates in philosophy and logic Additionally it offers inspiration for physicists and computer scientists involved in the modeling and simulation of complex behaviors for which the representation of internal time should be considered together with the notion of objective external time
