

### About the Lesson

In this activity, students will identify whether points lie within a shaded region that is bounded by linear inequalities. The focus is on testing the points for truth in the inequality. Students will use a graph to verify their answers. As a result, students will:

- Visually determine the location of a point with regard to shading or the line itself (above, below, or on the line itself).
- Answer True or False as to whether a point satisfies multiple conditions established by linear inequalities.

### Vocabulary

- addend
- additive inverse
- integer
- subtrahend

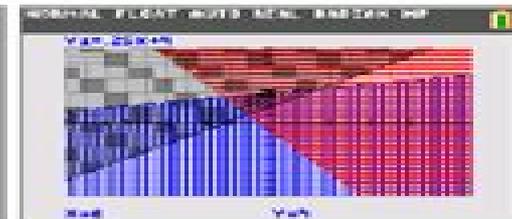

### Teacher Preparation and Notes

- Students will utilize a random number generator to create unique scenarios and answer questions about the points plotted as a result.
- Students will organize their thinking by using a table on the worksheet to answer True or False as to whether a point lies within a shaded region.
- Students will use the [test] menu to evaluate inequalities as true or false.

### Activity Materials

- Compatible TI Technologies:
