Truthmakers The Contemporary Debate:

Truthmakers Helen Beebe, Julian Dodd, 2005-08-25 to follow Metaphysics and Truthmakers Jean-Maurice Monnoyer, 2013-05-02 The essays collected in this volume concern the general question of truthmaking Most of them also bear upon the metaphysical nature of truthmakers moments tropes property instances Aristotelian substances states of affairs meanings or essences Taking as their starting point a famous seminal paper by K Mulligan P Simons and B Smith as well as D Armstrong s outstanding contribution to the subject they offer a fresh assay of the main concepts involved in order to assess the explanatory value of truthmakers and truthmaker necessitarianism and explore such delicate issues as contingent truth bare possibility tensed propositions the ontological irreducibility of relations the subsistence of facts and the epistemic role of negative truths The collection as a whole provides a comprehensive and thought provoking survey of the current debate about truthmaking theory and deserves to be read carefully by anyone interested in the relationship between language thought and reality With contributions from David ARMSTRONG Stefano CAPUTO Fran ois CLEMENTZ Pascal ENGEL Herbert HOCHBERG Philipp KELLER Jonathan LOWE Jean Maurice MONNOYER Kevin MULLIGAN Stephen MUMFORD Frederic NEF Peter SIMONS Barry SMITH Jonathan SIMON **The Routledge Handbook of Properties**

A.R.J. Fisher, Anna-Sofia Maurin, 2023-12-22 Philosophical questions regarding both the existence and nature of properties are ubiquitous in ordinary life the sciences and philosophical theorising In philosophy it is one of the oldest topics discussed in various intellectual traditions East and West reaching back to Plato and Aristotle Today in the analytic tradition properties continue to be a core area of study and research The Routledge Handbook of Properties is an outstanding reference source to this perennial topic and is the first major volume of its kind It contains forty specially commissioned chapters written by an international team of expert contributors and is divided into nine clear parts Methodology and Metaontology Distinctions Realism about Universals Nominalism Trope Theory Properties in Causation Time and Modality Properties in Science Properties in Language and Mind Properties in the Normative Realm the Social World and Aesthetics The Routledge Handbook of Properties is essential reading for anyone studying and researching metaphysics metametaphysics and ontology and will also be of interest to those in closely related areas such as philosophy of science philosophy of language philosophy of mind ethics and aesthetics

Metaphysics Lukáš Novák, Daniel D. Novotný, Prokop Sousedík, David Svoboda, 2013-05-02 Throughout the greater part of the twentieth century both in the analytic and continental traditions metaphysics was deemed to be pass The last few decades however have witnessed a remarkable growth of interest among analytic philosophers in various traditional metaphysical topics such as modality truth causality etc which resulted in the emergence of various forms of analytic metaphysics The new forms of metaphysics differ from its traditional forms mostly in their methodology we may notice various applications of contemporary formal logical techniques and in the range of proposed solutions to particular problems Besides these and other differences however there are also many similarities and there are even some who

intentionally develop traditional metaphysical themes using the contemporary analytical methods All these developments call for detailed exploration which is the general goal of the present publication *Metaphysics Aristotelian Scholastic Analytic* The publication is the fruit of the conference which took place in Prague in 2010 and which had for its aim to bring together those willing to explore relations between the traditional and contemporary concerns both from among the leading analytic philosophers working in metaphysics and the historians of philosophy devoted to the study of the metaphysical tradition The specific focus of the conference was a re examination of topics such as categories metaphysical structure substance and accident existence modalities and predication [Mind, Values, and Metaphysics](#) Anne Reboul,2014-08-13 This book addresses five main topics of metaphysics in its first section formal objects and truth makers tropes properties and predicates varieties of relations and the notion of explanation in metaphysics The second part of this volume focuses on the history of philosophy with an emphasis on Austrian philosophy the ideas of Bolzano Wittgenstein Locke and Bergson amongst others are explored in the papers presented here This is the first volume in a two volume set that originates from papers presented to Professor Kevin Mulligan covering the subjects that he contributed to during his career including ontology mind and value history and philosophy of mind and philosophy of language This volume contains thirty two chapters written by researchers from across Europe North America and North Africa These papers cover topics in metaphysics ranging from Lehrer and Tolliver s discussion of truth and tropes to Johansson s defence of the distinction between thick and thin relations and Persson and Sahlin s presentation of the difficulties inherent in applying the concept of explanation in metaphysics Papers on the history of philosophy include a look at Bolzano s formative years and his conception of mathematics De Libera examines Brentano s adverbial theory of judgment and Fisette traces the history of the Philosophical Society of the University of Vienna in the late 19th and early 20th century Marion contests the trendy pragmatist accounts that lump Wittgenstein and Heidegger together and there are analyses of Locke and Bergson s work amongst the many papers presented here This volume contains three chapters in French and one in Spanish The second volume of this set looks at ethics values and emotions epistemology perception and consciousness as well as philosophy of mind and philosophy of language [The Oxford Handbook of Truth](#) Michael Glanzberg,2018-07-04 Truth is one of the central concepts in philosophy and has been a perennial subject of study Michael Glanzberg has brought together 36 leading experts from around the world to produce the definitive guide to philosophical issues to do with truth They consider how the concept of truth has been understood from antiquity to the present day surveying major debates about truth during the emergence of analytic philosophy They offer critical assessments of the standard theories of truth including the coherence correspondence identity and pragmatist theories They explore the role of truth in metaphysics with lively discussion of truthmakers proposition determinacy objectivity deflationism fictionalism relativism and pluralism Finally the handbook explores broader applications of truth in philosophy including ethics science and mathematics and reviews formal work on truth and its application to semantic

paradox This Oxford Handbook will be an invaluable resource across all areas of philosophy *A Theory of Truthmaking* Jamin Asay, 2020-04-30 The theory of truthmaking has long aroused skepticism from philosophers who believe it to be tangled up in contentious ontological commitments and unnecessary theoretical baggage In this book Jamin Asay shows why that suspicion is unfounded Challenging the current orthodoxy that truthmaking's fundamental purpose is to be a tool for explaining why truths are true Asay revives the conception of truthmaking as fundamentally an exercise in ontology a means for coordinating one's beliefs about what is true and one's ontological commitments He goes on to show how truthmaking connects to analyticity truth and realism and how it contributes to debates over nominalism presentism mathematical objects and fictional characters His book is the most comprehensive exploration to date into what truthmaking is and how it contributes to metaphysical debates across philosophy and will interest a wide range of readers in metaphysics and beyond

Boston Studies in the Philosophy of Science, 1997 Comptes Rendus Philosophiques, 2008 **Truth and Truthmaking in 17th-century Scholasticism** Brian Embry, 2015 Some propositions are true and others are false What explains this difference Some philosophers have recently defended the view that a proposition is true because there is an entity its truthmaker that makes it true Call this the truthmaker principle The truthmaker principle is controversial occasioning the rise of a large contemporary debate about the nature of truthmaking and truthmakers What has gone largely unnoticed is that scholastics of the early modern period also had the notion of a truthmaker verificativum and this notion is at the center of early modern scholastic disputes about the ontological status of negative entities the past and future and uninstantiated essences My project is to explain how early modern scholastics conceive of truthmaking and to show how they use the notion of a truthmaker to regiment ontological enquiry I argue that the notion of a truthmaker is born of a certain conception of truth according to which truth is a mereological sum of a true mental sentence and its intentional object This view entails the truthmaker principle and is responsible for some surprising metaphysical views For example it leads many early modern scholastics to posit irreducible negative entities as truthmakers for negative truths giving rise to an extensive literature on the nature of negative entities In order to find truthmakers for the so called eternal truths such as A human being is an animal some philosophers claim that individual essences distinct from and independent of God necessarily have

being from eternity Other early modern scholastics reject these extravagant views they argue that only positive present tense truths are made true by existing things This view is motivated jointly by i a distinctive theory of truth bearers ii a common sense view of the truth conditions for negative tensed and modal truths and iii the idea that truths are about their truthmakers I argue that this view has significant philosophical consequences and should be attractive to those who think both that truth is grounded in being and that not every truth has a truthmaker
