## Whats It Worth:

Praiseworthiness Zoë Johnson King, 2025-10-13 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations Philosophers have had a lot to say about moral blameworthiness but much less about moral praiseworthiness In this book Zo Johnson King bucks the trend she offers a conceptual framework with which to theorise about praiseworthiness in its own right and a comprehensive theory of the types of thing for which we can be praiseworthy and the substantive conditions under which we are praiseworthy for things of each type Johnson King argues that what we are fundamentally praiseworthy for what makes us good people to the extent that we are are what we care about and what we try to do She then argues that we can be praiseworthy for what we successfully do and bring about to the extent that our actions are deliberate and are coming from a good place In developing this account Johnson King draws on resources from moral metaphysics moral epistemology moral metasemantics and philosophy of action as well as from the philosophical literature on moral responsibility She then uses her account to shed light on some practical issues concerning improving your own praiseworthiness by working on yourself the prevalence of moral luck and the impact of oppression and injustice on praiseworthiness The final chapter turns from praiseworthiness to the ethics of praise Johnson King takes the backlash against praise of essential workers during the pandemic as a case study that illustrates an array of pitfalls around which we must delicately skirt when attempting to praise the praiseworthy

explores what academics have valued historically in teaching and also addresses the major reforms of the last 20 years Reforms have essentially changed the nature of western higher education but have made little real difference to the outcomes for student learning and society whereas teaching with values in all subjects has the potential to radically alter student experiences *Sessional Papers* British Columbia,1911 *Arithmatic for schools and colleges, by W.
