Supplement**, 1880 **Twenty-Five Astronomical Observations That Changed the World** Michael Maret-Crosby, 2013-06-28 *Twenty Five Astronomical Observations That Changed the World* takes twenty five journeys through space back in time and into human history We begin with the simplest sight of the Tycho Crater on the Moon through a repeat of Galileo s observations of Jupiter s moons and then move out towards the nebulae stars and galaxies The astronomical observations repeat the original groundbreaking discoveries that have changed our understanding of science and ourselves This title contains graded observing challenges from the straightforward to the more difficult in chapter order It offers clear observing tips and lots of practical help presuming no prior in depth knowledge of equipment Binoculars and or a small astronomical telescope are all that is required for most of the observations Secondly it explores for each observation the science of what is seen adding to the knowledge and enjoyment of amateur astronomers and offering lots of reading for the cloudy nights when there is not a star in view Thirdly the book puts the amateur astronomers observations into a wider perspective *Twenty Five Astronomical Observations That Changed the World* makes the observer part of that great story of discovery Each chapter each observing challenge shows how to observe and then how to look with understanding The projects begin with practicalities where the object is how best is it observed and with what appropriate equipment usually a small to medium aperture amateur telescope binoculars even the naked eye *Twenty Five Astronomical Observations that Changed the World* guides even the inexperienced amateur

astronomer beginners can use the book around a variety of night sky objects and reminds the more experienced how they can best be seen These practical observations put us in contact with all the history and culture surrounding them through scientific speculation and literature to those first fuzzy images made in 1959 by the Russian space probe Luna 3 *Nature* Sir Norman Lockyer,1906 A Thin Cosmic Rain Michael W. Friedlander,2002-11-30 Enigmatic for many years cosmic rays are now known to be not rays at all but particles the nuclei of atoms raining down continually on the earth where they can be detected throughout the atmosphere and sometimes even thousands of feet underground This book tells the long running detective story behind the discovery and study of cosmic rays a story that stretches from the early days of subatomic particle physics in the 1890s to the frontiers of high energy astrophysics today Writing for the amateur scientist and the educated general reader Michael Friedlander a cosmic ray researcher relates the history of cosmic ray science from its accidental discovery to its present status He explains how cosmic rays are identified and how their energies are measured then surveys current knowledge and theories of thin cosmic rain The most thorough up to date and readable account of these intriguing phenomena his book makes us party to the search into the nature behavior and origins of cosmic rays and into the sources of their enormous energy sometimes hundreds of millions times greater than the energy achievable in the most powerful earthbound particle accelerators As this search led unexpectedly to the discovery of new particles such as the muon pion kaon and hyperon and as it reveals scenes of awesome violence in the cosmos and offers clues about black holes supernovas neutron stars quasars and neutrinos we see clearly why cosmic rays remain central to an astonishingly diverse range of research studies on scales infinitesimally small and large Attractively illustrated engagingly written this is a fascinating inside look at a science at the center of our understanding of our universe *The Spectator* ,1874 Knowledge ,1882 *The Nineteenth Century and After* ,1886 Knowledge... Edwin Sharpe Grew,Baden Fletcher Smyth Baden-Powell,Arthur Cowper Ranyard,Wilfred Mark Webb,1882 The Observatory ,1909 *The Classical Weekly* ,1926 *Reports and Transactions Cardiff Naturalists' Society*,1873
