Wesleyan Theology and Social Science M. Kathryn Armistead, Brad D. Strawn, Ronald W. Wright, 2009-12-14 Science and religion are living organic and creative traditions Both see humans as profoundly interconnected and in some way responsible for our environs This worldview is especially true for social science and Wesleyan religious tradition While the dance between science and religion will always be complex it can also be enjoyable and mutually satisfying However when couples dance only one at a time can lead and both have to acknowledge the importance of the other This book is written with the conviction that theology and science can have a beneficial relationship if only both recognize their mutual value to the lives of persons The Methodist tradition links the welfare of the body with care for the soul Historically ministry involved tending to physical and psychological needs of the Methodist band members but also to non churched poor and imprisoned Thus Methodists built places of worship schools

orphanages and hospitals For John Wesley the founder of Methodism practical divinity always involved attention to whole persons including their living conditions and basic physical needs He sought to improve life for all Therefore throughout his life Wesley was interested in theology but also scientific discovery as paths toward a better future He believed that both were of value to help people move toward perfection He even attended lectures and offered medical treatment in the first Methodist meeting hall in Bristol England As a scientific practitioner Wesley wrote the best selling book *Primitive Physic or An Easy and Natural Method of Curing Most Diseases* using the cutting edge science of his day Packed next to the Bible this book traveled with countless pioneers as they settled the territories that became the United States Methodism has a long tradition of using science and religion to carry out the biblical mandate to go into the world and make disciples for Jesus Christ This book seeks to continue that legacy by bringing current trends in psychology into conversation with Wesleyan theology Composed of essays that represent different psychologies and theological traditions which trace their roots to Wesley this book aims at creating a space where science and theology can partner and dance In the book readers will find positive psychology self psychology object relations family systems moral psychology and neuroscience in conversation with various theologies Under this canopy the contributors see themselves as people called Methodists seeking to follow the example of Wesley to use all available tools to enable persons to live fully and well

Johann Friedrich Herbart Frederick C. Beiser,2021-12-23 Though little known today Johann Friedrich Herbart was one of the leading philosophers of his age the competitor of Schelling and Hegel Although he was trained by Fichte Herbart soon became a critic of the idealist tradition and developed a philosophy antithetical to it His own philosophy was opposed to the idealist tradition in important respects he defended a dualism between the factual and normative he was an ontological pluralist rather than monist and he accepted crucial Kantian dualisms that had been rejected by the idealists Herbart was also an important forerunner of analytic philosophy first in breaking with the idealist tradition and second in insisting that the proper method of philosophy is the analysis of concepts rather than speculation about the universe as a whole In the first intellectual biography of Herbart in English Frederick C Beiser studies the development of one of 19th century Germany s most important philosophers from his education in Oldenburg and Jena to his final years in G ttingen
