Why Kids Can't Read Patrick R. Riccards, Phyllis Blaunstein, Reid Lyon, 2014-12-18 Nearly forty percent of all fourth graders in this country cannot read at grade level and this number rises to sixty percent for children coming from poor families This gap in learning increases as students go through grade school and is a primary reason for school failure Ironically this problem comes even after comprehensive research demonstrates that nearly all children can learn to read if taught using proven effective instruction Here the authors describe the principles of this research in language that non educators can understand and educators can use It discusses how to recognize whether the research on reading is being used appropriately and if not how to make that happen Through the eyes of parents and educators who have succeeded in their own struggles to change the educational system the book provides the reader with the tools and knowledge for transforming the way reading is taught in their children s classrooms This book takes the reader step by step through an understanding of the research on reading and ways in which a single determined person can make a difference in the learning ability of every student in our nation s schools Part One is a series of chapters written by individuals who discuss what they experienced during these battles and what made them successful Part Two is written by a series of experts who describe how they have overcome the challenges involved in creating widespread change in school systems This second edition also includes information on Common Core State Standards increased testing and accountability efforts and related policy issues that directly impact how children learn to read The appendix is filled with resources people places sample tools a glossary and bibliography to help the reader Some key features of this book include Easy to understand descriptions of research First person stories of how they have helped teach their kids to read Clear understanding of scientifically based reading and how it can be applied to the classroom Summary of reading related Common Core State Standards Sample tools for parent advocates Resource lists of government officials organizations that can help with reading efforts

Why Our Children Can't Read, and what We Can Do about it Diane McGuinness, 1997 A neuropsychologist shows how outmoded methods for teaching reading have resulted in plummeting literacy levels and offers a new program

The Science of Reading Adrian Johns, 2023-04-05 For the first time the story of how and why we have plumbed the mysteries of reading and why it matters today Reading is perhaps the essential practice of modern civilization For centuries it has been seen as key to both personal fulfillment and social progress and millions today depend on it to participate fully in our society

Yet at its heart reading is a surprisingly elusive practice This book tells for the first time the story of how American scientists and others have sought to understand reading and by understanding it to improve how people do it Starting around 1900 researchers convinced of the urgent need to comprehend a practice central to industrial democracy began to devise instruments and experiments to investigate what happened to people when they read They traced how a good reader s eyes moved across a page of printed characters and they asked how their mind apprehended meanings as they did so In schools across the country millions of Americans learned to read through the application of this science of reading At the same time workers fanned out across the land to extend the science of reading into the social realm mapping the very geography of information for the first time Their pioneering efforts revealed that the nation s most pressing problems were rooted in drastic informational inequities between North and South city and country and white and Black and they suggested ways to tackle those problems Today much of how we experience our information society reflects the influence of these enterprises This book explains both how the science of reading shaped our age and why with so called reading wars still plaguing schools across the nation it remains bitterly contested

Stories from Home Jerry Clower,2011-04-04 Brimming with his rich humor Jerry Clower s book manifests the unsurpassed southern art of yarn spinning It also shows the nature of the man for whom good storytelling is more than just show business Nashville s funniest man had a serious side Deep in the merry heart of this comic entertainer were the codes and values that made him an esteemed humanitarian He was named America s best country comic for nine years in a row and was called the funniest American storyteller since Will Rogers and the Mouth of the Mighty Mississippi This boisterous downhome man s loving extroverted manner and his forthright display of positive feelings for others arose from the substance of sober rock solid regional values he gained from maturing in the rural South Stories from Home embraces both sides of Jerry Clower the funny man and the serious man and shows his anecdotal humor in the mainstream of the South s great oral tradition of folktales and narratives Jerry Clower s hilarious stories about possum hunting coon dogs and the rambunctious Ledbetter clan were standards in his stage routines videos and albums In Stories from Home many of his fans favorite Clower tales are included Here too is a long interview in which he explored his beliefs and tells how he gained firm convictions about race religion education and family as well as an intolerance of negativism

The State of the System Paul W. Bennett,2020-09-23 Over the last fifty years Canada s public schools have been absorbed into a modern education system that functions much like Max Weber s infamous iron cage Crying out for democratic school level reform the system is now a centralized bureaucratic fortress that every year becomes softer on standards for students less accessible to parents further out of touch with communities and surprisingly unresponsive to classroom teachers Exploring the nature of the Canadian education order in all its dimensions The State of the System explains how public schools came to be so bureaucratic confronts the critical issues facing kindergarten to grade 12 public schools in all ten provinces and addresses the need for systemic reform Going beyond a diagnosis of the stresses strains and

ills present in the system Paul Bennett proposes a bold plan to re engineer schools on a more human scale as the first step in truly reforming public education In place of school consolidation and managerialism one size fits all uniformity limited school choice and the success for all curriculum Bennett advocates for a new set of priorities decentralize school governance deprogram education ministries and school districts listen to parents and teachers and revitalize local education democracy Tackling the thorny issues besetting contemporary school systems in Canada The State of the System issues a clarion call for more responsive engaged and accountable public schools **A Republic: If You Can Keep it** Jim

Hollingsworth,2024-08-08 At the end of the Constitutional Convention Ben Franklin was asked by a woman what sort of government the delegates had provided His answer was A Republic If you can keep it That is a simple yet profound statement America has been a successful republic for over two hundred years Yet beginning with the New Deal of Franklin Delano Rosevelt we have gradually lost the truth of what it means to be a republic Gradually and mainly with the work of the Democrats we have become a collectivist society we have gradually become not a republic but a socialist country with bigger government and a tendency to government tyranny Now we are at a crossroads This next election may well determine if we will remain a constitutional republic or fall down into being no more than a third world banana republic It is time to retake control of our government which is a servant of the people not a master We need to control our government on the national level Congress the President the Supreme Court But we also need to take control on the local level schools libraries city councils and county and state governments It is not too late but the time is moving quickly This book explains much of the problem and provides some hope as to how to overcome it America has been a great nation and can be great again *Really*

Now, why Can't Our Johnnies Read? Jon Eisenson,1989 *Herald of Gospel Liberty* Elias Smith,1915 **You Can Teach a Child that Reading Can be Fun** Ellen C. Henderson,1956 This interesting book by the former editor of Speech Magazine is a step by step guide for parents to teach their own children to read Detailed instructions make it unnecessary that the teacher be a college graduate in education or a certified teacher Teaching children to read begins with teaching proper pronunciation intonation and stress The importance of phonics is stressed and the subject of inner speech is explained

Normal Instructor and Primary Plans ,1919 **Normal Instructor and Teachers World** ,1919 *Georgia Education Journal* ,1955 *Geography reading books, adapted to the requirements of the new code of 1880* Geography reading books,1880 *Saturday Review* ,1955 **Misreading Reading** Gerald Coles,2000 Coles rejects the skills emphasis approach to teaching early readers and learners and leans toward a whole language technique **General Semantics Bulletin** ,1954 **Today's Education** ,1981 Journal of Reading ,1980
