Subcontinent Dr Anu Dhawan,2023-01-03 Indo Iranian cultural relations are a continuous historical process starting from the gray dawn of the common united life of the ancestors of these twoi great Asian civilizations as part and parcel of the original Indo European stock The process has unfolded itself in history through alternate phases of harmony and conflict and has percolated down to our times The ancestors of Iranian and Indian Aryans of history are believed to have lived in a common habitat in Central Asia as an undivided ethnic group from the fourth millenium to that of the third millenium B C

They shared a common life experience and were inextricably linked up on the cultural level in spite of their numerous internal differences and conflicts. From this common habitat the inhabitants migrated in two branches towards the west and the east between circa 4000 and 3000 B.C. Those who moved towards the east entered Iran and India where they were to develop their distinctive civilizations throughout the succeeding ages. The undivided Indo-Iranians are believed to have lived for about a millennium circa 4000-3000 B.C. In this period they lived a common life and developed a specific Indo-Iranian civilization, culture, and religion which we can partially reconstruct by a comparative study of the Veda and the Zend Avesta. There are amazing similarities in their language, culture, and religion which strike us as little short of identity. From time immemorial the Orient has been the cradle of civilization that amongst all other Oriental countries, Iran and India stand first and foremost in their contribution to world culture and that these two nations were the torch bearers of knowledge, the forerunners of a fine civilization at a time when the civilized countries of the modern world were still plunged in dim obscurity of ignorance. Linguistic affinities, national kinship, and distinctive racial characteristics constitute the inseparable bonds of friendship and fellowship that have brought the two nations together from the earliest times throughout the course of history. These two countries have been tied together by strong and lasting bonds, and both in ancient times and during the medieval era, their cultures have profited mutually by a continual exchange of knowledge and ideas. These lasting ties prompted Jawaharlal Nehru, the first Prime Minister of independent India, to write in his famous book *Discovery of India*. Dr. Anu Dhawan, [Bibliography of Art and Architecture in the Islamic World \(2 Vol. Set\)](#) Susan Sinclair, C. H. Bleaney, Pablo García Suárez, 2012. Following the tradition and style of the acclaimed *Index Islamicus*, the editors have created this new *Bibliography of Art and Architecture in the Islamic World*. The editors have surveyed and annotated a wide range of books and articles from collected volumes and journals published in all European languages except Turkish between 1906 and 2011. This comprehensive bibliography is an indispensable tool for everyone involved in the study of material culture in Muslim societies. *Iran*, 2007. In the centuries, both handicraft and industry have taken advantage of its easy castability and remarkable ductility combined with good mechanical and corrosion resistance. Although its mechanical properties are now well known, the simple f.c.c. structure still makes copper a model material for basic studies of deformation and damage mechanism in metals. On the other hand, its increasing use in many industrial sectors stimulates the development of high performance and high efficiency copper-based alloys. After an introduction to classification and casting, this book presents modern techniques and trends in processing copper alloys, such as the developing of lead-free alloys and the role of severe plastic deformation in improving its tensile and fatigue strength. Finally, in a specific section, archaeometallurgy techniques are applied to ancient copper alloys. The book is addressed to engineering professionals, manufacturers, and
