The Internet Playground Ellen Seiter, 2005 Based on four years of experience teaching computers to 8-12 year olds media scholar Ellen Seiter offers parents and educators practical advice on what children need to know about the Internet and when they need to know it *The Internet Playground* argues that contrary to the promises of technology boosters teaching with computers is very difficult Seiter points out that the Internet today resembles a mall more than it does a library While children love to play online games join fan communities and use online chat and instant messaging the Internet is also an appallingly aggressive marketer to children and as this book passionately argues an educational boondoggle

The Heart of the Internet Jacques Vallee, 2003 Jacques Vallee was among the engineers and visionaries who set up the Internet hoping to connect people not control them through information For a few years it seemed that this dream was being realized But after the dot com crash of 2001 much of the Web's information flowed into the media giants and corporate conglomerates leaving millions of Net denizens without true freedom of choice And then there is the threat of government snooping All is not lost but it is time for public and private actions to rebuild the dream and win back our freedom In *The*

Heart of the Internet Vallee reconstructs the history of computer technology and destroys a few myths Eniac was not the first computer Apple did not invent the mouse and neither did Xerox uses first person recollections and notes to describe the series of breakthroughs that transformed computers from calculating machines to universal platforms for new media describes the Internet in today s marketplace pressured on the one hand by commercial interests seeking to influence not merely our purchases but our thoughts and on the other by governmental obsession to harness the whole system to its own narrow definitions of security sacrificing our privacy and possibly our freedom in the process states a set of principles for network citizens and suggests how we can create new standards for Internet usage Book jacket
