Muslim Spaces of Hope Richard Phillips, 2013-07-04 Debates about contemporary Islam and Muslims in the West have taken some negative turns in the depressing atmosphere of the war on terror and its aftermath This book argues that we have been too preoccupied with problems not enough with solutions The increased mobilisation and scrutiny of Muslim identities has taken place in the context of a more general recasting of racial ideas and racism a shift from overtly racial to ostensibly ethnic and cultural including religious categories within discourses of social difference The targeting of Muslims has been associated with new forms of an older phenomenon imperialism New divisions between Muslims and others echo colonial binaries of black and white colonised and coloniser within practices of divide and rule This book speaks to others who have been marginalised and colonised and to wider debates about social difference oppression and liberation

The Place of the Mosque Akel Ismail
Kahera,2022-06-14 The Place of the Mosque Genealogies of Space Knowledge and Power extends Foucault s analysis Of Other Spaces and the ideological conflicts which underlie the controversies of our day and take place between pious descendants of time and tenacious inhabitants of space This book uses Foucault s framework to illuminate how mosques have been threatened in the past from the Cord ba Mosque in the eighth century to the development of Moorish aesthetics in the United States in the nineteenth century to the clashes surrounding the building of mosques in the West in the twentieth and twenty first centuries Akel Kahera uses Foucault s genealogy to elaborate on and study the subjects that are caught in the emergence of a battle the social and political will to power the networks of power and the rituals of power within the interstitial space In going beyond individual buildings to broader geographical and genealogical dimensions of the power struggles The Place of the Mosque reconciles the public space experience governmentality and micro powers paving the way for a new philosophical language Expanding architectural and urban regional approaches Kahera shows the biopolitical significance of the problem of space

law whose primary subject is the wall the book determines the meaning of a wall and then uses it to analyze the space of Fez One of a growing number of studies to address space as a category of critical analysis the book makes the following contributions to scholarship Methodologically it breaks with the tradition of viewing Islamic architecture as a well defined object observed by a specialist at an aesthetically directed distance rather it inhabits the logic of this architecture by rethinking it discursively from within the culture that produced it Hermeneutically it sheds new light on one of North Africa s oldest medinas and thereby illuminates a type of environment still common to much of the Arab Muslim world Empirically it brings to the attention of mainstream scholarship a legal discourse and aesthetic that contributed to the form and longevity of this type of environment and it exposes a preoccupation with walls and other limits in premodern urban Arab Muslim culture and a mythical paradigm informing the foundation narratives of a number of historic medinas Presenting a fresh perspective for the understanding of Muslim urban society and thought this innovative study will be of interest to students and researchers of Islamic studies architecture and sociology *Islam in the United States* Robert McNab Kerr,1998

The Holy City of Medina Harry Munt, 2014-07-31 This is the first book length study of the emergence of Medina in modern Saudi Arabia as a widely venerated sacred space and holy city over the course of the first three Islamic centuries the seventh to ninth centuries CE This was a dynamic period that witnessed the evolution of many Islamic political religious and legal doctrines and the book situates Medina s emerging sanctity within the appropriate historical contexts The book focuses on the roles played by the Prophet Muhammad by the Umayyad and early Abbasid caliphs and by Muslim legal scholars It shows that Medina s emergence as a holy city alongside Mecca and Jerusalem as well as the development of many of the doctrines associated with its sanctity was the result of gradual and contested processes and was intimately linked with important contemporary developments concerning the legitimation of political religious and legal authority in the Islamic world
