For a long time the philosophically difficult topic of religious experience has been on the sidelines of phenomenological research with a notable exception of Anthony Steinbock who focused on mysticism The book *The Problem of Religious Experience Case Studies in Phenomenology with Reflections and Commentaries* brings together preeminent as well as emerging voices in the field with fresh views on the topic Originating from dialogues of the Society for the Phenomenology of Religious Experience these two volumes cover a spectrum of phenomenological approaches with a thematization of the field in the form of case studies Contributions from theology comparative religion psychology and the philosophy of religion come together in the commentaries and meta narrative written by Olga Louchakova Schwartz the editor Volume I *The Primeval Showing of Religious Experience* examines religious experience with regard to its lived interiority in light of the problem of the ego cogito including the recent research on the embodiment of subjectivity and phenomenological materiality Volume I also sheds light on religious experience in regard for the problems of its constitution passive synthesis the world and otherness Volume II *Doxastic Perspectives in the Phenomenology of Religious Experience* addresses the phenomenology of revelation shows how different approaches treat the question of essence in religious experience i e what is it that makes religious experience religious and demonstrates how religious experience contributes to the psychological horizon of meaning The book identifies the growing edges in the phenomenological research of religious experience and is useful for psychologists philosophers and theologians alike The two volumes offer an excellent interdisciplinary introduction to the phenomenon of religious experience The case studies presented in them are arranged under the central topics of self alterity revelation and psychological aspects of religious experience and provide outstanding examples of applied phenomenology Hans Rainer Sepp Charles University Prague and Central European Institute of Philosophy In the context of the return of religion this book offers both a timely and necessary contribution to confront the peculiarities of religious experience Providing readers with applied phenomenological descriptions in an interdisciplinary spirit these debates will prove stimulating for a resurgent field of research that is starting to refine its conceptual devices and methodological presuppositions University of Vienna *Religious Experience and Experiencing Religion in Religious Education* Ulrich Riegel, Eva-Maria Leven, Daniel Fleming, 2018 In Europe religious and spiritual education happens in a context which is at the same time increasingly secular and religiously plural This places the problem of religious experience on the agenda Today most students of religious and spiritual education lack appropriate experiences and show different opinions about what religion or spirituality could be This setting raises several questions How can religious experience be conceptualized in a

context of religious plurality and secularity with the traditional religious traditions as just one option among others How does lived religion contribute to such a conceptualization Do the concepts of spirituality and implicit religion give way to a new understanding of religious experience How can be grasped religious experience beyond the traditional religious practices Do traditional empirical methods still fit Which concepts and methods can we utilize in bringing religious experience into religious or spiritual education
