**Relevance and Narrative Research** Matei Chihaiia, Katharina Rennhak, 2019-03-28 Relevance is one of the most widely used buzz words in academic and other socio political discourses and institutions today which constantly ask us to be relevant To date there is no profound scholarly conceptualization of the term however which is widely accepted in the humanities Relevance and Narrative Research closes this gap by initiating a discussion which turns the vaguely defined evaluative tool relevance into an object of study The contributors to this volume do so by firmly situating questions of relevance in the context of narrative theory Briefly put they ask either What can relevance do for narrative research or What can narrative research do for better understanding relevance or both The basic assumption is that relevance is a relational term Further assuming that most if not all relations which human beings encounter within their cultures are narratively constructed the contributors to this volume suggest that reflections on narrative and narrative research are fundamental to any endeavor to conceptualize notions of relevance      A Practical Guide to the NEC3 Engineering and Construction Contract Michael

Rowlinson, 2011-04-06 Launched in 1991 the New Engineering Contract NEC has become one of the UK s leading standard forms of contract for major construction and civil engineering projects Currently in the third edition popularly known as NEC 3 it is a process based construction contract embodying project management best practice and thus the basic philosophy behind the contract is different to the more adversarial principles and approach of other standard construction contracts Written as a practical guide to the application of the procedures contained in NEC 3 this book will aid users in the transition from their use and understanding of the other standard construction contracts to the collaborative project management based approach of the ECC Written for anyone working in the construction industry working on a project under the ECC it will be of interest to the complete construction supply chain including employers construction professions contractors and sub contractors It will also be of interest to consultants and lawyers advising any of these parties either in the preparation of contract documentation or the resolution of problem situations which may arise A practical guide to the application of the procedures contained in the NEC Engineering and Construction Contracts Written specifically for people actually using and administering the NEC contracts rather than lawyers Covers all the variations created by the Main and Secondary Options
