Web Data Management:

Web Data Management Sourav S. Bhowmick, Sanjay K. Madria, Wee K. Ng, 2003-11-07 Existence of huge amounts of data on the Web has developed an undeferring need to locate right information at right time as well as to integrating information effectively to provide a comprehensive source of relevant information There is a need to develop efficient tools for analyzing and managing Web data and efficiently managing Web information from the database perspective The book proposes a data model called WHOM Warehouse Object Model to represent HTML and XML documents in the warehouse It defines a set of web algebraic operators for building new web tables by extracting relevant data from the Web as well as generating new tables from existing ones These algebraic operators are used for change detection

Web Data Management Serge Abiteboul, Ioana Manolescu, Philippe Rigaux, Marie-Christine Rousset, Pierre Senellart, 2011-11-28 The Internet and World Wide Web have revolutionized access to information Users now store information across multiple platforms from personal computers to smartphones to websites such as Youtube and Picasa As a consequence data management concepts methods and techniques are increasingly focused on distribution concerns Now that information largely resides in the network so do the tools that process this information This book explains the foundations of XML the Web standard for data management with a focus on data distribution It covers the many facets of distributed data management on the Web such as description logics that are already emerging in today s data integration applications and herald tomorrow s semantic Web It also introduces the machinery used to manipulate the unprecedented amount of data collected on the Web Several Putting into Practice chapters describe detailed practical applications of the technologies and techniques Striking a balance between the conceptual and the practical the book will serve as an introduction to the new global information systems for Web professionals as well as for master s level courses

Web Data Management Practices: Emerging Techniques and Technologies Vakali, Athena, Pallis, George, 2006-09-30 This book provides an understanding of major issues current practices and the main ideas in the field of Web data management helping readers to identify current and emerging issues as well as future trends The most important aspects are discussed Web data mining content management on the Web Web applications and Web services Provided by publisher

Semantic Web Information Management Roberto de Virgilio, Fausto Giunchiglia, Letizia Tanca, 2010-01-08 Databases have been designed to store large volumes of data and to provide efficient query interfaces Semantic Web formats are geared towards capturing domain knowledge interlinking annotations and offering a high level machine processable view of information However the gigantic amount of such useful information makes efficient management of it increasingly difficult undermining the possibility of transforming it into useful knowledge The research presented by De Virgilio Giunchiglia and Tanca tries to bridge the two worlds in order to leverage the efficiency and scalability of database oriented technologies to support an ontological high level view of data and metadata The contributions present and analyze techniques for semantic information management by taking advantage of the synergies between the logical basis of the Semantic Web and the logical foundations of data management The book's leitmotif is to propose models and methods especially tailored to represent and manage data that is appropriately structured for easier machine processing on the Web After two introductory chapters on data management and the Semantic Web in general the remaining contributions are grouped into five parts on Semantic Web Data Storage Reasoning in the Semantic Web Semantic Web Data Querying Semantic Web Applications and Engineering Semantic Web Systems The handbook like presentation makes this volume an important reference on current work and a source of inspiration for future development targeting academic and industrial researchers as well as graduate students in Semantic Web technologies or database design

Principles of Distributed Database Systems M. Tamer Özsu, Patrick Valduriez, 2019-12-02 The fourth edition of this classic textbook provides major updates This edition has completely new chapters on Big Data Platforms distributed storage systems MapReduce Spark data stream processing graph analytics and on NoSQL NewSQL and polystore systems It also includes an updated web data management chapter that includes RDF and semantic web discussion an integrated database integration chapter focusing both on schema integration and querying over these systems The peer to peer computing chapter has been updated with a discussion of blockchains The chapters that describe classical distributed and parallel database technology have all been updated The new edition covers the breadth and depth of the field from a modern viewpoint Graduate students as well as senior undergraduate students studying computer science and other related fields will use this book as a primary textbook Researchers working in computer science will also find this textbook useful This textbook has a companion web site that includes background information on relational database fundamentals query processing transaction management and computer networks for those who might need this background The web site also includes all the figures and presentation slides as well as solutions to exercises restricted to instructors

Design and Implementation of Data Mining Tools Bhavani Thuraisingham, Latifur Khan, Mamoun Awad, Lei Wang, 2009-06-18 Focusing on three applications of data mining Design and Implementation of Data Mining Tools explains how to create and employ systems and tools for intrusion detection Web page surfing prediction and image classification

Mainly based on the authors own research work the book takes a practical approach to the subject The first part of the book

Advances In Multimedia & Databases For The New Century - A Swiss/Japanese Perspective Yoshifumi

Masunaga, Stefano Spaccapietra, 2000-04-19 This Switzerland Japan Joint Seminar on Multimedia and Databases was held to achieve at least three goals First it enabled us to present and discuss our recent research results and exchange our ideas for further promotion of science and technology The second goal was to establish a friendly relationship between the Swiss and the Japanese The last but not least aim was to disseminate information about our plans by publishing the proceedings of this seminar We thought that publishing the outcome of the seminar would be essential in order not to store the treasure the seminar results secretly

Applied System Simulation Mohammad S. Obaidat, Georgios I. Papadimitriou, 2012-12-06

Simulation and modeling are efficient techniques that can aid the city and regional planners and engineers in optimizing the operation of urban systems such as traffic light control highway toll automation consensus building public safety and environmental protection When modeling transportation systems such as freeway systems arterial or downtown grid systems the city planner and engineer is concerned with capturing the varied interactions between drivers automobiles and the infrastructure Modeling and simulation are used to effectively optimize the design and operation of all of these urban systems It is possible that in an urban simulation community workshop citizens can work interactively in front of computers and be able using the click of the mouse to walk up to their own front porch looking at the proposed shopping mall alternatives across the street from virtually any angle and proposed bridge or tunnel and see how it can reduce traffic congestion Buildings can be scaled down or taken out their orientation can be changed in order to check the view and orientation in order to have better site with efficient energy conservation The stone or brick material on a building can be replaced by colored concrete or more trees and lampposts can be placed on the site Such flexibility in simulation and animation allows creative ideas in the design and orientation of urban sites to be demonstrated to citizens and decision makers before final realization

Building Trustworthy Semantic Webs Bhavani Thuraisingham, 2007-12-05

Semantic Webs promise to revolutionize the way computers find and integrate data over the internet They will allow Web agents to share and reuse data across applications enterprises and community boundaries However this improved accessibility poses a greater threat of unauthorized access which could lead to the malicious corruption of information

Secure Semantic

Service-Oriented Systems Bhavani Thuraisingham, 2010-12-14

As the demand for data and information management continues to grow so does the need to maintain and improve the security of databases applications and information systems In order to effectively protect this data against evolving threats an up to date understanding of the mechanisms for securing semantic Web technologies is essential

Data Management in the Semantic Web Mal Jin, Hal Jin, 2012-02-01

Effective and efficient data management is vital to today's applications Traditional data management mainly focuses on information procession involving data within a single organisation Data are unified according to the same schema and there

exists an agreement between the interacting units as to the correct mapping between these concepts Nowadays data management systems have to handle a variety of data sources from proprietary ones to data publicly available Investigating the relevance between data for information sharing has become an essential challenge for data management This book explores the technology and application of semantic data management by bringing together various research studies in different subfields
