Aircraft Carriers Norman Polmar,2006-09-01 Aircraft Carriers is the definitive history of world aircraft

carrier development and operations Norman Polmar's revised and updated two volume classic describes the political and technological factors that influenced aircraft carrier design and construction meticulously records their operations and explains their impact on modern warfare Volume I provides a comprehensive analysis of carrier developments and warfare in the first half of the twentieth century and examines the advances that allowed the carrier to replace the battleship as the dominant naval weapons system Polmar gives particular emphasis to carrier operations from World War I through the Japanese strikes against China in the 1930s to World War II in the Atlantic Mediterranean Arctic and Pacific theaters It begins with French inventor Clément Ader's remarkably prescient 1909 description of an aircraft carrier The book then explains how Britain led the world in the development of aircraft carrying ships soon to be followed by the United States and Japan While ship based aircraft operations in World War I had limited impact they foreshadowed the aircraft carriers built in the 1920s and 1930s The volume also describes the aircraft operating from those ships as well as the commanders who pioneered carrier aviation Aircraft Carriers has benefited from the technical collaboration of senior carrier experts Captain Eric M Brown and General Minoru Genda as well as noted historians Robert M Langdon and Peter B Mersky Aircraft Carriers is heavily illustrated with more than 400 photographs some never before published and maps Volume II which is forthcoming from Potomac Books in the winter 2006 2007 ISBN 978 1 57488 665 8 will cover the period 1946 to the present

VIOLET LIGHTNING John Eric Vining, 2020-11-13 An epic achievement over one hundred years in the making In December 1941 Japan had perhaps the greatest combination of land sea and air forces the world had ever seen and she used these to conquer a huge empire in the Western Pacific and East Asia Yet by August 1945 Japan had been beaten to her knees by the combined power of China Great Britain and the United States Was this destruction inevitable Did Japan have no chance to defeat America and her allies Why would she think she could successfully battle the two greatest industrial powers the world had ever known Great Britain and the United States at the same time Violet Lightning A Blueprint for Japanese Victory in the Pacific 1941 1942 is a sweeping narrative over a century in the making From the first confrontation in 1895 between the United States and Japan over Hawaii to the massive Japanese defeats at Midway and Guadalcanal in 1942 to author John Eric Vining's first interest in the Japanese American conflict in the fall of 1967 by reading Carrier War in the Pacific to the fall of 1995 when Vining first put pen to paper on this project and finally to 2020's finished product by Page Publishing Vining reviews a history of the acrimony between Japan and the United States in the first half of the Twentieth Century He then builds what one reviewer calls a chillingly believable scenario for a Japanese victory in the greatest of all wars Violet Lightning poses and answers the question Could Japan really have pulled it off You just might find yourself coming around to a point of view you didn't believe was possible
