The Norwegian Language in the Digital Age Georg Rehm, Hans Uszkoreit, 2012-07-04 This white paper is part of a series that promotes knowledge about language technology and its potential. It addresses educators, journalists, politicians, language communities, and others. The availability and use of language technology in Europe varies between languages. Consequently, the actions that are required to further support research and development of language technologies also differ for each language. The required actions depend on many factors such as the complexity of a given language and the size of its community. META NET, a Network of Excellence funded by the European Commission, has conducted an analysis of current language resources and technologies. This analysis focused on the 23 official European languages as well as other important national and regional languages in Europe. The results of this analysis suggest that there are many significant research gaps for each language. A more detailed expert analysis and assessment of the current situation will help maximise the impact of additional research and minimize any risks. META NET consists of 54 research centres from 33 countries that are working with stakeholders from commercial businesses, government agencies, industry, research organisations, software companies, technology providers, and European universities. Together they are creating a common technology vision while developing a strategic research agenda that shows how language technology applications can address any research gaps by 2020.

Spoken Norwegian, Basic Course: Units 1-12 Einar Haugen, 1944      An Introduction to Norwegian Dialects Olaf Husby, 2008      **Norwegian Grammar and Reader** Julius E. Olson, 1897      *The Phonology of Norwegian* Gjert Kristoffersen, 2000. At the end of the fourteenth century, Norway, having previously been an independent kingdom, became by conquest a province of Denmark and remained so for three centuries. In 1814, as part of the fallout from the Napoleonic wars, the country became a largely independent nation within the monarchy of Sweden. By this time, however, Danish had become the language of government, commerce, and education, as well as of the middle and upper classes. Nationalistic Norwegians sought to reestablish native identity by creating and promulgating a new language based partly on rural dialects and partly on Old Norse. The upper and middle classes sought to retain a form of Norwegian close to Danish that would be intelligible to themselves and to their neighbours in Sweden and Denmark. The controversy has gone on ever since. One result is that the standard dictionaries of Norwegian ignore pronunciation for no version can be counted as received. Another is that there has been considerable variety and change in Norway.      **Norwegian Discourse Ellipsis** Mari Nygård, 2018-04-15. This book develops a grammar model which accounts for discourse ellipses in spoken Norwegian. This is a previously unexplored area which has also been sparsely investigated internationally. The model takes an exoskeletal view where lexical items are inserted late and where syntactic structure is generated independently of lexical items. Two major questions are addressed. Firstly, is there active syntactic structure in the ellipsis site? Secondly, how are discourse ellipses licensed? It is argued that both structural and semantic restrictions are required to account for the empirical patterns. Discourse ellipses can be seen as

a contextual adaptation Ellipsis is only possible in certain contexts The existence of ellipsis may lead to the impression that syntax is partly destroyed However the analysis shows that narrow syntax is not affected The underlying structure stays intact as the licensing restrictions concern only phonological realization Hence the grammar of discourse ellipses is best characterized as an interface phenomenon
