**Sudden Spring** Rick Van Noy,2019-01-15 The results of climate change make the headlines almost daily All across America and the globe communities have to adapt to rising sea levels intensified storms and warmer temperatures One way or another climate change will be a proving ground We will either sink in cases where the land is subsiding or swim finding ways to address these challenges While temperatures and seas are rising slowly we have some immediate choices to make If we act quickly and boldly there is a small window of opportunity to prevent the worst We can prepare for the changes by understanding what is happening and taking specific measures There is commitment already in the climate change system To minimize those effects will require another kind of commitment the kind Rick Van Noy illustrates in these stories about a climate distressed South Like Rachel Carson s groundbreaking work Silent Spring Rick Van Noy s Sudden Spring is a call to action to mitigate the current trends in our environmental degradation By highlighting stories of people and places adapting to the impacts of a warmer climate Van Noy shows us what communities in the South are doing to become more climate resilient and to survive a slow deluge of environmental challenges
