The Time:

Proust, Photography, and the Time of Life Suzanne Guerlac, 2020-11-12 Through an engagement with the philosophies of Proust's contemporaries Félix Ravaisson, Henri Bergson, and Georg Simmel, Suzanne Guerlac presents an original reading of *Remembrance of Things Past*. At the recherche du temps perdu, challenging traditional interpretations, she argues that Proust's magnum opus is not a melancholic text but one that records the dynamic time of change and the complex vitality of the real. Situating Proust's novel within a modernism of money and broadening the exploration through references to cultural events and visual technologies—commercial photography, photojournalism, pornography, the regulation of prostitution, the Panama Scandal, and the Dreyfus Affair—this study reveals that Proust's subject is not the esthetic recuperation of loss but rather the adventure of living in time on both the individual and the social level at a concrete historical moment.

The Time Machine H. G. Wells, 2017-01-26 A brilliant scientist constructs a machine which with the pull of a lever propels him to the year AD 802 701. Part of the Macmillan Collector's Library, a series of stunning clothbound pocket-sized classics with gold-foiled edges and ribbon markers. These beautiful books make perfect gifts or a treat for any book lover. This edition of *The Time Machine* features an introduction by Dr. Mark Bould. The Time Traveller finds himself in a verdant, seemingly idyllic landscape where he is greeted by the diminutive Eloi people. The Eloi are beautiful but weak and indolent, and the explorer is perplexed by their fear of the dark. He soon discovers the reason for their fear: the Eloi are not the only race to have inherited the earth. When his time machine disappears, the Time Traveller must descend alone into the subterranean tunnels of the Morlocks, a terrifying, carnivorous people who toil in darkness to reclaim it.

The Time Machine Hypothesis Damien Broderick, 2019-07-12 Every age has characteristic inventions that change the world. In the 19th century, it was the steam engine and the train. For the 20th, electric and gasoline power, aircraft, nuclear weapons, even ventures into space. Today, the planet is awash with electronic business chatter and virtual reality entertainment, so brilliant that the division between real and simulated is hard to discern. But one new idea from the 19th century has failed so far to enter reality: time travel using machines to turn the time dimension into a two-way highway. Will it come true as foreseen in science fiction? Might we expect visits to and from the future sooner than from space? That is the Time Machine Hypothesis, examined here by futurist Damien Broderick, an award-winning writer and theorist of the genre of the future. Broderick homes in on the topic through the lens of science as well as fiction, exploring some fifty different time travel scenarios and conundrums found in the science fiction literature and film.
