An Introduction to Veterinary Humanities Alison Skipper, Ruth Serlin, Carol Gray, 2026-04-15 Although veterinary professionals can now provide technologically sophisticated medical care for animals every day they ask themselves questions that lie outside the realm of science How do I overcome my dread of this hostile client How can I protect myself from moral stress What level of intervention is ethically appropriate for this patient What does professionalism mean for me While the work can be immensely rewarding the veterinary sector can be very challenging It is a world where clinical care is influenced and professionalism affected by multiple factors relating to colleagues patients animal caregivers and wider societal contexts We deal every day with human problems that science alone can't solve This book offers new ways to think about these issues through the emerging interdisciplinary field of veterinary humanities It breaks new ground in bringing together insights from multiple academic perspectives history art ethics social sciences and many more to think about veterinary topics in a new way through contributions from more than forty authors Some are veterinary professionals with expertise in humanities and social science others explore the veterinary world from a primary background in the humanities and social sciences Addressing topics from across the veterinary sector their writing ranges from deeply personal reflections to academic essays

FEATURES 32 chapters by different authors with veterinary and or humanities expertise Linking sections that relate these contributions to overarching themes UK based scholarship with wider relevance Structured to stimulate reflection and discussion in university in the workplace or anywhere people consider what it means to be involved in the veterinary world This anthology will be particularly relevant to those training or working in the veterinary sector whatever your role or level of experience Other readers who are interested in animal welfare and human animal relationships will also find it accessible because the book assumes no clinical knowledge and offers no clinical guidance It s a book about being human and working with animals intended to help you think about what that means for you Veterinary Controversies and Ethical Dilemmas Tanya Stephens,R. Eddie Clutton,Polly Taylor,Kathy Murphy,2025-09-22 This book identifies increasing concerns with the veterinary profession and confronts them provocatively with a view to stimulating positive change A central theme is the emergence of the profitable fur baby which is being propagated through encouraged anthropomorphism a limited evidence base overdiagnosis overtreatment and practice corporatisation Richly accompanied with thoughts on veterinary celebrity the misrepresentation of veterinary success research using client owned animals unregulated treatments and end of life decision making the book represents a small room full of large elephants With experienced contributors from around the world each chapter combines personal stories with evidence based reflections While many of the subjects presented will have undergone some degree of ethical analysis the book itself does not intend to teach veterinary ethics instead its role is to identify key concerns with the profession s current trajectory and to present them with candour from the perspective of concerned veterinary professionals Ideal for use within the veterinary curriculum to stimulate undergraduate thought and discussion this book will also be a valuable reference for practitioners as the veterinary profession comes to terms with life in a post truth era **Exotic Animal Medicine for the Veterinary Technician** Bonnie Ballard,Ryan Cheek,2016-07-25 Now in its third edition and for the first time in full color Exotic Animal Medicine for the Veterinary Technician is a comprehensive yet clear introduction to exotic animal practice for technicians in the classroom and clinic setting alike With an emphasis on the exotic species most likely to present to a veterinary practice coverage includes avian reptiles amphibians fish small mammals and wildlife Now in full color Features anatomy restraint common diseases to radiology surgical assisting and parasitology New chapter on fish medicine Companion website offering review questions and images from the text in PowerPoint **Zoo Vet News** ,2001 **Biology, Medicine, and Surgery of Elephants** Murray Fowler,Susan K.
