

The image features a dense, overlapping grid of numerous small, rounded square thumbnails, each depicting a different scene from a Roblox game. The scenes are diverse, ranging from a city street with cars and buildings to a beach with a palm tree and a car, a character in a blue dress, a character in a red shirt, and various other virtual environments. The thumbnails are arranged in a way that they appear to be floating or scattered across a dark background. In the center of the image, the word "ROBLOX" is written in a large, bold, white, sans-serif font. The letters are slightly shadowed, giving them a three-dimensional appearance as if they are resting on or floating above the grid of thumbnails. The overall composition is vibrant and colorful, showcasing the wide variety of user-generated content available on the Roblox platform.

*Probabilistic Tsunami Hazard and Risk Analysis* Mathilde B. Sørensen,Jörn Behrens,Fatemeh Jalayer,Finn Løvholt,Stefano Lorito,Irina Rafliana,Mario A. Salgado-Gálvez,Jacopo Selva,2026-03-03 This is an open access book Probabilistic tsunami hazard and risk assessment abbreviated as PTHA and PTRA respectively has evolved quickly over the past 10 to 15 years and now forms the basis of many risk mitigation efforts Methods are largely based on those used for probabilistic hazard and risk assessment for earthquakes However while seismic risk can be represented by a single workflow tsunami risk is characterized by a number of different and cascading workflows Funded in parts by the COST Action CA18109 AGITHAR 2019 2023 a group of more than 120 experts gathered to advance the scientific basis for PTHA and PTRA Amongst them were over 50 volunteering to contribute to this so called cookbook for PTHA and PTRA The aim of our cookbook is to give an overview of existing methods for PTHA and PTRA to unify the description of named workflows and

to make best practices examples available to a wider community We use the analogy of a cookbook because we strive to describe the ingredients i e the basic building blocks of PTHA and PTRR and give examples of good recipes i e well designed workflows for concrete application fields Furthermore a cookbook gives inspiration but does not necessarily standardize methods So while this effort aims at some standardization of methodology it gives enough freedom to build on this knowledge to further develop the field The book is intended for scientists but also practitioners and decision makers in tsunami hazard and risk mitigation
