 offering a Ph D program to students in Public Administration it also is a research institute in which a great number of
 scholars from seven Dutch universities participate and work on a common research program The chapters in this book are all
 products of the research program that started in 1995 This program had the ambition to explore the frontiers of the
 discipline in two respects First by studying a number of recent developments in society and their consequences for the
 functioning of government These consequences can be summarised as the development of a system of multi level and multi
 actor governance Second by contributing to the knowledge of institutions both by studying what factors are most important
 in the formation and change of institutions and by studying the effects of institutions on the behaviour of actors in different
 political and administrative settings Most contributions to this volume either have their origin in conferences organized by
 the NIG or were published as an NIG working paper We are grateful to Marcia Clifford and Connie Hoekstra who prepared
