Rounding numbers, adding & subtracting multi-digit numbers, comparing fractions, perimeter, area, data, bar graphs, line plots & more!

ROUNDING NUMBERS UNIT 1

You can round whole numbers to the nearest ten or hundred.

Rounding Numbers to the Nearest Ten

Nearest tens are numbers that are multiples of 10. They will always have a 0 in the ones place.

To round to the nearest ten, you need to determine which ten the number is closest to.

EX: Round 18 to the nearest ten.

Look at 18 on a number line:

18 is closer to 20 than it is to 10. Round 18 **up** to 20.

To round to the nearest ten, you can look at the value of the ones place.

- If the value of the ones place is 1, 2, 3, or 4, round **down** to the nearest ten.
- If the value of the ones place is 5, 6, 7, 8, or 9, round **up** to the nearest ten.

EX: Round 32 to the nearest ten.

Look at the value of the ones place.

2 is in the ones place of 32. Round 32 **down** to the nearest ten, which is 30.

Rounding Numbers to the Nearest Hundred

Nearest hundreds are numbers that are multiples of 100. They will always have a 0 in both the tens place and the ones place.

To round to the nearest hundred, you need to determine which hundred the number is closest to.

EX: Round 128 to the nearest hundred.

Look at 128 on a number line:

128 is closer to 100 than it is to 200. Round 128 **down** to 100.

To round to the nearest hundred, you can look at the value of the tens place.

- If the value of the tens place is 1, 2, 3, or 4, round **down** to the nearest hundred.
- If the value of the tens place is 5, 6, 7, 8, or 9, round **up** to the nearest hundred.

EX: Round 567 to the nearest hundred.

Look at the value of the tens place.

6 is in the tens place of 567. Round 567 **up** to the nearest hundred, which is 600.

Tip! Underline the place value that determines whether you will round up or down.

ADDING & SUBTRACTING MULTI-DIGIT NUMBERS UNIT 2

When you add and subtract multi-digit numbers, align the numbers by place value. Then add or subtract beginning with the lowest place.

You may need to regroup values when adding whole numbers.

EX: Add $573 + 288$.

$$\begin{array}{r} 573 \\ +288 \\ \hline 861 \end{array}$$

You may need to regroup values when subtracting whole numbers.

EX: Subtract $1,952 - 645$.

$$\begin{array}{r} 1,952 \\ -645 \\ \hline 1,307 \end{array}$$

You Can Do This!

Sarah collected 1,503 baseball cards. She gave 225 to her brother. How many baseball cards does Sarah have left?

Sarah has 1,278 baseball cards left.

$$\begin{array}{r} 1,503 \\ -225 \\ \hline 1,278 \end{array}$$

THE RELATIONSHIP BETWEEN MULTIPLICATION & DIVISION UNIT 3

Just like addition and subtraction are **inverse operations**, multiplication and division are inverse operations. This means they are opposite operations.

You can create multiplication and division **fact families**. A **fact family** will contain two division operations and two multiplication operations with the same three numbers.

EX: What is the fact family of 3, 7, and 21?

$$\begin{array}{l} 3 \times 7 = 21 \\ 7 \times 3 = 21 \\ 21 \div 3 = 7 \\ 21 \div 7 = 3 \end{array}$$

EX: Use your knowledge of multiplication fact families to solve the problem $54 \div 6$.

Since $9 \times 6 = 54$, then $54 \div 6 = 9$.

Ask yourself, "What number times 6 is equal to 54?"

Archbald, 1998 This report compares and contrasts the evaluation methods and findings of the American Federation of Teachers AFT Council for Basic Education CBE and the Fordham Foundation reviews of state English language arts and mathematics content standards It states that the reviews found that state content standards vary greatly in how they are

organized in the levels of detail and specificity of their content prescriptions and in the clarity of their expression According to the report although a number of the states standards were found to be of exemplary quality and could be used as models an unacceptably large number of state content standards were judged to be of inadequate quality The report cites the average ratings on the 0 to 4 scale given by each rating group for English language arts and for mathematics It finds considerable discrepancy in the reviewers ranking of the states there was considerable disagreement among the reviewers about which states had high quality and which states had low quality content standards The report states that the reviewers used different criteria defining the qualities they used for evaluation and applying their evaluation criteria differently The report concludes by discussing ways research and policy initiatives could improve the quality of state content standards Contains 18 references 11 notes and 3 tables of data NKA *Common Core State Standards*, 2014 **Common Core State Standards Transition Tasks for Mathematics, Grade 6** Walch Education, 2011-04 Supporting students and teachers moving toward Common Core State Standards The move to Common Core State Math Standards represents two significant transitions for teachers and students First the new standards identify rigorous mathematics content that often exceeds previous expectations Second the vision for the Common Core encompasses a series of Mathematical Practices that include skills processes and attitudes that can only be developed through extensive experience with skillfully facilitated problem solving and effective discourse To facilitate these TRANSITIONS Walch Education has developed this collection of problem solving tasks that target the new content and embody the new practices Request a free task These 15 tasks will help you to infuse existing curriculum with both the content and the practices of the Common Core and support problem based teaching and learning Each task takes only 20 30 minutes for students to complete with another 10 20 minute debrief to enhance reasoning and communication and to crystallize understanding For the teacher background information and implementation suggestions links to relevant resources content and research a series of suggested questions to encourage problem solving reflection and discourse guiding rather than leading students For the students a meaningful context that may transcend traditional school subjects opportunity to collaborate and to grapple with real problem solving **Teaching to the Math Common Core State Standards** F.
