Schoepfle, 1993 **Statistical Abstract of Latin America, Volume 25 (1987)**, 1987 Blood of the Earth Kevin A. Young, 2017-02-14 Conflicts over subterranean resources particularly tin oil and natural gas have driven Bolivian politics for nearly a century Resource nationalism the conviction that resource wealth should be used for the benefit of the nation has often united otherwise disparate groups including mineworkers urban workers students war veterans and middle class professionals and propelled an indigenous union leader Evo Morales into the presidency in 2006 Blood of the Earth reexamines the Bolivian mobilization around resource nationalism that began in the 1920s crystallized with the 1952 revolution and continues into the twenty first century Drawing on a wide array of Bolivian and US sources Kevin A Young reveals that Bolivia became a key site in a global battle among economic models with grassroots coalitions demanding nationalist and egalitarian alternatives to market capitalism While US supported moderates within the revolutionary regime were able to defeat more radical forces Young shows how the political culture of resource nationalism though often comprising contradictory elements constrained government actions and galvanized mobilizations against neoliberalism in later decades His transnational and multilevel approach to the 1952 revolution illuminates the struggles among Bolivian popular sectors government officials and foreign powers as well as the competing currents and visions within Bolivia's popular political cultures Offering a fresh appraisal of the Bolivian Revolution resource nationalism and the Cold War in Latin America Blood of the Earth is an ideal case study for understanding the challenges shared by countries across the Global South **Undocumented Mexicans in the USA** David M. Heer, 1990-11-30 When this volume was published in 1990 undocumented Mexican immigrants had become an important component of the US population In this book the author analyzes the results of a unique survey conducted in Los Angeles County where an estimated 44 percent of the

undocumented Mexican population lived The survey allows the author to make comparisons among the groups of undocumented and legal Mexican immigrants and to study the effects of legal status on their living conditions The author also examines the findings of a number of other social scientists providing a comprehensive summary of the data on undocumented Mexicans in the US In his conclusion he turns to an evaluation of policy options for incorporating this group into the US population and for immigrants The book will be useful to sociologists and other social scientists as well as to lawyers and policy experts studying the problem of illegal immigrants

Bilborrow, 1998 Internal migration and urbanization are key dimensions of the process of socioeconomic development The unprecedented movement of peoples within the borders of their own countries is one of the greatest transformations witnessed in the 20th century Policy analysts especially those from developing countries where internal migration can be felt at first hand view migration as one of the most important factors affecting the course of development It is within this context that UNFPA convened the Symposium on Internal Migration and Urbanization in Developing Countries in January 1996 in preparation for the United Nations World Conference on Human Settlements in Istanbul in June 1996 The final results of the symposium are found in this book This volume provides a better understanding at global level of internal migration issues of concern to policy analysts
