## **Statistical And Neural Classifiers:**

Statistical and Neural Classifiers Sarunas Raudys, 2001-01-29 The classification of patterns is an important area of research which is central to all pattern recognition fields including speech image robotics and data analysis Neural networks have been used successfully in a number of these fields but so far their application has been based on a black box approach with no real understanding of how they work In this book Sarunas Raudys an internationally respected researcher in the area provides an excellent mathematical and applied introduction to how neural network classifiers work and how they should be used

**Handbook Of Pattern Recognition And Computer Vision (2nd Edition)** Chi Hau Chen, Louis-francois Pau, Patrick S P Wang, 1999-03-12 The very significant advances in computer vision and pattern recognition and their applications in the last few years reflect the strong and growing interest in the field as well as the many opportunities and challenges it offers The second edition of this handbook represents both the latest progress and updated knowledge in this dynamic field The applications and technological issues are particularly emphasized in this edition to reflect the wide applicability of the field in many practical problems To keep the book in a single volume it is not possible to retain all chapters of the first edition However the chapters of both editions are well written for permanent reference This indispensable handbook will continue to serve as an authoritative and comprehensive guide in the field

**Computer Analysis of Images and Patterns** Wladyslaw Skarbek, 2003-06-30 Computer analysis of images and patterns is a scientific field of longstanding tradition with roots in the early years of the computer era when electronic brains inspired scientists Moreover the design of vision machines is a part of humanity's dream of the artificial person I remember the 2nd CAIP held in Wismar in 1987 Lectures were read in German English and Russian and proceedings were also only partially written in English The conference took place under a different political system and proved that ideas are independent of political walls A few years later the Berlin Wall collapsed and Professors Sommer and Klette proposed a new formula for the CAIP let it be held in Central and Eastern Europe every second year There was a sense of solidarity with scientific communities in those countries that found themselves in a state of transition to a new economy A well implemented idea resulted in a chain of successful events in Dresden 1991 Budapest 1993 Prague 1995 Kiel 1997 and Ljubljana 1999 This year the conference was welcomed at Warsaw There are three invited lectures and about 90 contributions written by more

than 200 authors from 27 countries Besides Poland 60 authors the largest representation comes from France 23 followed by England 16 Czech Republic 11 Spain 10 G many 9 and Belarus 9 Regrettably in spite of free registration fees and free accommodation for authors from former Soviet Union countries we received only one accepted paper from Russia
