## **Statistical Movement In Early Victorian:**

The Statistical Movement in Early Victorian Britain Michael J. Cullen,1975 Examines the main features of the statistical movement in early Victorian Britain especially in the 1830s and 1840s until its demise in 1852 in order to find out how it organized itself to assess its achievements and to discover a distinctive philosophy if it had one Most of the social statisticians of the time are included here and their activities are introduced by a survey of British social statisticians from 1660 to 1830 The remainder of the book is divided into two parts government departments and social statistics 1832 1852 the statistical societies of London Manchester and of other provincial towns such as Glasgow Bristol Belfast and Leeds

**The Statistical Movement in Early Victorian Britain: the Foundation of Empirical Social Research** M. J. Cullen,1975 Scientific Advice to the Nineteenth-Century British State Roland Jackson,2023-11-14 In twenty first century Britain scientific advice to government is highly organized integrated across government departments and led by a chief scientific adviser who reports directly to the prime minister But at the end of the eighteenth century when Roland Jackson s account begins things were very different With this book Jackson turns his attention to the men of science of the day who derived their knowledge of the natural world from experience observation and experiment focusing on the essential role they played in proffering scientific advice to the state and the impact of that advice on public policy At a time that witnessed huge scientific advances and vast industrial development and as the British state sought to respond to societal economic and environmental challenges practitioners of science engineering and medicine were drawn into close involvement with politicians Jackson explores the contributions of these emerging experts the motivations behind their involvement the forces that shaped this new system of advice and the legacy it left behind His book provides the first detailed analysis of the provision of scientific engineering and medical advice to the nineteenth century British government parliament the civil service and the military

*When Information Came of Age* Daniel R. Headrick,2000-12-28 The book provides a concise and readable survey of the many conceptual developments between 1700 and 1850 and draws connections to leading technologies of today It documents three breakthroughs in information systems that date to the period the classification and nomenclature of Linneaus the chemical system devised by Lavoisier and the metric system It shows how eighteenth century political arithmeticians and demographers pioneered statistics and graphs as a means for presenting data succinctly and visually It describes the transformation of cartography from art to science as it incorporated new methods for determining longitude at sea and new data on the measure of the arc of the meridian on land Finally it looks at the early steps in codifying and transmitting information including the development of dictionaries the invention of semaphore telegraphs and naval flag signaling and the conceptual changes in the use and purpose of postal services
