**Statistics for Ornithologists** Jim Fowler, Louis Cohen, 1991      **Statistics for Ornithologists** J. FOWLER, 1984

*Statistics in Ornithology* Byron J. T. Morgan, 1980      *Current Ornithology* D.M. Power, 2013-06-29 In this volume I include chapters on continental population trends ornithology's contribution to the habitat concept social organization outside the breeding season the role of predation in limiting numbers and the evolution of prolonged incubation periods Authors are based in Belgium the United Kingdom and the United States Is there evidence for wholesale population declines in North American birds Robert Askins says yes with qualifications Fragmentation of forest causes the population of many forest interior species to decline and loss of winter forest habitat in Mexico Central America and the Greater Antilles is potentially serious Trends over the past 25 years are however difficult to discern Grassland and shrubland specialists have likewise diminished over the past quarter century Askins calls for management of regional landscapes to maintain habitat diversity As for habitats William Block and Leonard Brennan review the role of ornithology in developing the concept of habitat Their intention is to stimulate ornithologists to consider habitat as a unifying concept in contemporary ecology They describe uses of the habitat concept in basic and experimental ecology Recent advances in sociobiology stimulated deeper interest in social organization Erik Matthysen has gathered a diversity of information on social organization outside the breeding season both in migratory and in nonbreeding resident birds He discusses populations that continue individual associations outside the breeding season and site related aggression territoriality and reviews a number of long term benefits of these behaviors      *Current Ornithology* Richard Johnston, 2013-11-11 It is not often that a century of scholarly activity breaks conveniently into halves but ornithology of the first half of the 20th century is clearly different from that of the second half The break actually can be marked in 1949 with the appearance of Meyer and Schuz's *Ornithologie als Biologische Wissenschaft* Prior to this ornithologists had tended to speak mostly to other ornithologists experiments the testing of hypotheses were uncommon and a concern for birds as birds was the dominant thread in our thinking Subsequent to 1949 ornithologists have tended to become ever more professional in their pursuits and to incorporate protocols of experimental biology into their work more importantly perhaps they have begun to show a concern for birds as agencies for the study of biology Many of the most satisfying of recent ornithological studies have come from reductionist research approaches and have been accomplished by specialists in such areas as biochemistry ethology genetics and ecology A great many studies routinely rely on statistical hypothesis testing allowing us to come to conclusions unmarred by wishful thinking Some of us are ready to tell the world that we are a hard science and perhaps that time is not so very far off for most of us Volume 2 examines several solid examples of late 20th century ornithology      **Who's who in Ornithology** John E.
