Hays, 1970      *Statistics : probability, inference, and decision : volume II* William L. Hays, 1970      *Comparative Statistical Inference* Vic Barnett, 2009-09-25 This fully updated and revised third edition presents a wide ranging balanced account of the fundamental issues across the full spectrum of inference and decision making Much has happened in this field since the second edition was published for example Bayesian inferential procedures have not only gained acceptance but are often the preferred methodology This book will be welcomed by both the student and practising statistician wishing to study at a fairly elementary level the basic conceptual and interpretative distinctions between the different approaches how they interrelate what assumptions they are based on and the practical implications of such distinctions As in earlier editions the material is set in a historical context to more powerfully illustrate the ideas and concepts Includes fully updated and revised material from the successful second edition Recent changes in emphasis principle and methodology are carefully explained and evaluated Discusses all recent major developments Particular attention is given to the nature and importance of basic concepts probability utility likelihood etc Includes extensive references and bibliography Written by a well known and respected author the essence of this successful book remains unchanged providing the reader with a thorough explanation of the many approaches to inference and decision making

**Information, Inference and Decision** G. Menges, 2012-12-06 Under the title Information Inference and Decision this volume in the Theory and Decision Library presents some papers on issues from the borderland of statistical inference philosophy and epistemology written by statisticians and decision theorists who belonged or are allied to the former Saarbrücken school of statistical decision theory In the first part I make an attempt to outline an objective theory of inductive behaviour on the basis of R A Fisher's statistical inference philosophy on the one hand and R Carnap's inductive logic on the other A special problem arising in the context of the new theory viz the problem of vagueness of concepts in particular in the social sciences is treated separately by H Skala and myself B Leiner has contributed some biographical and bibliographical notes on the objective theory of inductive behaviour Part II is concerned with inference philosophy D A S Fraser the founder of structural inference theory characterizes and compares some inference philosophies and discusses his own and the arguments of the critics of his structural theory In my opinion Fraser's structural inference theory is suited to complete Fisher's inference philosophy in some essential points if not to replace it An interesting task for future research work is to establish the connection between Fraser's theory and Carnap's ideas in the framework of an objective theory of inductive behaviour      **Statistics: Probability, Inference, and Decision** William Lee Hays, Robert L.
