

The Cell

R Pring

The Cell:

The Cell as a Machine Michael Sheetz, Hanry Yu, 2018-01-11 This unique introductory text explains cell functions using the engineering principles of robust devices Adopting a process based approach to understanding cell and tissue biology it describes the molecular and mechanical features that enable the cell to be robust in operating its various components and explores the ways in which molecular modules respond to environmental signals to execute complex functions The design and operation of a variety of complex functions are covered including engineering lipid bilayers to provide fluid boundaries and mechanical controls adjusting cell shape and forces with dynamic filament networks and DNA packaging for information retrieval and propagation Numerous problems case studies and application examples help readers connect theory with practice and solutions for instructors and videos of lectures accompany the book online Assuming only basic mathematical knowledge this is an invaluable resource for graduate and senior undergraduate students taking single semester courses in cell mechanics biophysics and cell biology

The Cell Cycle Valerie W. Hu, 2012-12-06 Interest in the cell cycle has grown explosively in recent years as a result of the identification of key cell cycle regulators and their substrates Aside from enhancing our understanding of normal cellular growth controls this new knowledge has also been valuable in elucidating mechanisms of growth deregulation which occur in diseased states such as cancer and in some instances viral or parasitic infections The Thirteenth Washington International Spring Symposium was organized with the intention of bringing together scientists working on different aspects of the cell cycle Scientific topics presented ranged from molecular regulators and effectors to mitosis specific changes in cell architecture to the role of the cell cycle in development and disease The goal of this gathering was to help formulate a more comprehensive and integrated picture of events driving and being driven by the cell cycle as well as to evaluate the possibilities for clinical application of this knowledge This symposium held in Washington D C from May 10 14 1993 was attended by more than 400 scientists from 20 countries including many of the scientific leaders in this field This volume contains most of the papers presented at the seven plenary sessions in addition to selected contributions from a total of nine special oral and poster sessions
