The Apollo 13 Mission Helen Zelon,2001-12-15 Discusses the Apollo 13 mission and surviving an explosion in space

Apollo 13 Laura B. Edge,2020-03-03 Houston we ve had a problem On April 13 1970 the three astronauts aboard the Apollo 13 spacecraft were headed to the moon when a sudden explosion rocked the ship Oxygen levels began depleting rapidly Electrical power began to fail Astronauts James Lovell Jack Swigert and Fred Haise were about to be stranded in the inky void of outer space The mission to the moon was scrapped Now Apollo 13 s only goal was to bring the crew home With the damaged spacecraft hurtling towards the moon at roughly six thousand miles per hour there was little hope of success But the astronauts and mission control were fully prepared to do whatever it took to return the crew to Earth This space disaster occurred at the peak of the United States Space Race against the Soviet Union But for four days in 1970 the two nations put aside their differences and the entire world watched the skies hoping and praying the astronauts would return safely As missions to Mars and commercial space flight become a reality the time is now to be reminded of our common humanity of how rivals can work together and support each other towards a shared goal Because no matter what happens or where we travel we all call Earth home

Surviving a Space Disaster Benjamin Tunby,2019-01-01 The Apollo 13 mission began smoothly But an explosion on the spacecraft changed everything Instead of landing on the moon the astronauts were fighting for their lives This true story reveals the quick thinking and teamwork it took to survive

Danger in Space Henry M. Holden,2012-07-01 Explores the Apollo 13 mission including the causes of the disaster aboard the spacecraft how the astronauts fixed the problems and how the crew were saved Provided by publisher

Apollo 13 United States. National Aeronautics and Space Administration,2000 In 1970 some considered Apollo 13 a catastrophic failure but it has since been recognised as one of NASA s truly great moments when the spirit of daring and ingenuity came to life in the team at Mission Control as they successfully brought the crew home In Apollo 13 the NASA mission report some of the rare official documentation of the voyage of Apollo 13 is collected and made commercially available for the first time

[Houston, We've Had a Problem](#) Charles River Charles River Editors,2017-12-20 Includes pictures Includes accounts of the mission written by the astronauts and members of Mission Control Includes online resources and a bibliography for further reading Includes a table of contents The only experiment we completed on Apollo 13

was not on the original mission list James Lovell Jr In the summer of 1969 Apollo 11 successfully landed men on the Moon for the first time in history and Apollo 12 successfully landed astronauts on the Moon just a few months after Apollo 11 s successful mission Apollo 12 was actually more successful than Apollo 11 from the standpoint of fulfilling the mission objectives but it was naturally overshadowed since it did not come first Another reason Apollo 12 is mostly forgotten today can be credited to the dramatic and fateful Apollo 13 mission which took twists and turns nobody could have predicted when it launched on April 11 1970 Apollo 13 s mission was to land on the Moon near the Fra Mauro highlands which were hills that had somehow formed in the middle of a huge crater tens of miles wide The mission was supposed to test for seismic activity and take samples to analyze the crater and try to find an explanation for the formation of the hills Of course as is widely known today Apollo 13 never made the landing The ever dependable Saturn V properly thrust Apollo 13 out of the Earth s orbit and toward the Moon but two days into the voyage the crew heard a loud bang At first the crew was not sure what had happened leading Commander James Lovell to famously transmit to Mission Control Houston we ve had a problem As it turned out one of the main oxygen tanks had ruptured in the Service Module causing a catastrophic failure The Command Service Module s fuel cells all shut down leaving the command Service Module to run on backup batteries In other words Apollo 13 was adrift between the Earth and the Moon with limited battery power With severely limited supplies and power Apollo 13 shut down the Command Service Module altogether and the entire crew had to rely on camping out in the Lunar Module which was only equipped to support two astronauts The Moon landing was obviously out of the question but Apollo 13 still had to orbit around the Moon to head back to Earth a trip that would take four more days Power and water were the two most critical shortages forcing the crew to maintain the Lunar Module at low energy The crew also had to worry about carbon dioxide building up and poisoning them because the Lunar Module s system to remove carbon dioxide was designed to support two people for a few days not three people for four days Once Apollo 13 rounded the Moon and headed back to Earth the crew and Mission Control managed to restart the Command Service Module rerouting power from the Lunar Module to the Command Service Module The crew also had to manually realign the spacecraft for reentry as Lovell had done for Apollo 8 Before reentry the Service Module was jettisoned from the spacecraft and pictures of it were taken to see what went so terribly wrong The crew then jettisoned the Lunar Module that had saved their lives leaving it to burn up in the Earth s atmosphere On the afternoon of April 17 Apollo 13 s Command Module made a nerve wracking but successful reentry into Earth s atmosphere allowing Lovell to consider the mission a successful failure Gene Kranz the Lead Flight Controller at Mission Control considered Apollo 13 s safe return to be NASA s finest hour Houston We ve Had a Problem The History of the Apollo 13 Mission analyzes the conception of the Apollo program and the events that brought about one of the most famous space missions in history Along with pictures of important people places and events you will learn about Apollo 13 like never before in no time at all *The Apollo 13 Mission* Donald B. Lemke,2006 In graphic novel format tells the dramatic

story of the rescue of the Apollo 13 astronauts *Survival in Space: The Apollo 13 Mission (Incredible True Stories, Book 1)*

Thirteen Henry S. F. Cooper,2013-12-31 An exciting minute by minute account of the Apollo 13 flight based on mission
control transcripts from Houston The New York Times On the evening of April 13 1970 the three astronauts aboard Apollo 13
were just hours from the third lunar landing in history But as they soared through space two hundred thousand miles from
Earth an explosion badly damaged their spacecraft With compromised engines and failing life support systems the crew was
in incomparably grave danger Faced with below freezing temperatures a seriously ill crewmember and a dwindling water
supply a safe return seemed unlikely Thirteen is the shocking and miraculous true story of how the astronauts and ground
crew guided Apollo 13 back to Earth Expanding on dispatches written for the New Yorker Henry S F Cooper Jr brings
readers unparalleled detail on the moment by moment developments of one of NASA s most dramatic missions *Apollo 13*
Alan Pierce,2005-01-01 Discusses defining moments in American history **Apollo 13** James Lovell,Jeffrey
Kluger,2019-02-12 NATIONAL BESTSELLER Astronaut Jim Lovell and coauthor Jeffrey Kluger s harrowing account of the
Apollo 13 disaster Serving as the basis for Ron Howard s blockbuster Apollo 13 the book reveals true details not shown in the
movie Thrilling and evocative you feel as though you re alongside Lovell in the lunar module Written with all the color and
drama of the best fiction Apollo 13 tells the full story of the moon shot that almost ended in catastrophe Minutes after a mid
flight explosion the three astronauts are forced to abandon the main ship for the lunar module a tiny craft designed to keep
two men alive for just two days As the hours tick away the narrative shifts from the crippled spacecraft to Mission Control
from engineers searching desperately for a way to fix the ship to Lovell s wife and children praying for his safe return The
entire nation watches as one crisis after another is met and overcome By the time the ship splashes down in the Pacific we
understand why the heroic effort to rescue Lovell and his crew is considered by many to be NASA s finest hour Inspiring and
astonishing the story of Apollo 13 is a timeless tribute to the enduring American spirit and sparkling individual heroism

Survival in Space David Long,2020 April 1970 Apollo 13 was launched from the Kennedy Space Center in Florida It
should have been the third manned Apollo mission to land on the moon But when an explosion on board damaged the
spacecraft it became a perilous and near impossible fight for survival The crew on board travelled further into space than any
other humans before them In this retelling of the Apollo 13 mission David Long shows how courage determination and

teamwork succeeded in beating all odds to bring the spacecraft home Particularly suitable for struggling reluctant or dyslexic readers

Failure Is Not an Option Gene Kranz,2001-02-21 This New York Times bestselling memoir of a veteran NASA flight director tells riveting stories from the early days of the Mercury program through Apollo 11 the moon landing and Apollo 13 for both of which Kranz was flight director Gene Kranz was present at the creation of America s manned space program and was a key player in it for three decades As a flight director in NASA s Mission Control Kranz witnessed firsthand the making of history He participated in the space program from the early days of the Mercury program to the last Apollo mission and beyond He endured the disastrous first years when rockets blew up and the United States seemed to fall further behind the Soviet Union in the space race He helped to launch Alan Shepard and John Glenn then assumed the flight director s role in the Gemini program which he guided to fruition With his teammates he accepted the challenge to carry out President John F Kennedy s commitment to land a man on the Moon before the end of the 1960s Kranz recounts these thrilling historic events and offers

new information about the famous flights What appeared as nearly flawless missions to the Moon were in fact a series of hair raising near misses When the space technology failed as it sometimes did the controllers only recourse was to rely on their skills and those of their teammates He reveals behind the scenes details to demonstrate the leadership discipline trust and teamwork that made the space program a success A fascinating firsthand account by a veteran mission controller of one of America s greatest achievements Failure Is Not an Option reflects on what has happened to the space program and offers his own bold suggestions about what we ought to be doing in space now
