challenges This text fills a need in training evaluators not met by current textbooks Kathryn E Newcomer George Washington University *Contested Issues in the Evaluation of Child Sexual Abuse* Kathleen Faller, Mark Everson, 2016-01-08 This book represents a significant contribution to the highly contested debate surrounding how allegations of child sexual abuse should be evaluated Despite decades of substantial research in this sensitive area professional consensus remains elusive A particular source of contention is the sensitivity vs specificity debate whether evaluators should aim to reduce the number of true allegations that are labelled false or to reduce the number of false allegations that are labelled true This edited collection aims to address directly and offer new insights into this debate It responds directly to Kuehnle and Connell s edited volume *The Evaluation of Child Sexual Abuse Allegations A Comprehensive Guide to Assessment and Testimony* 2009 which included chapters which advocated strong specificity positions at the expense of sensitivity The chapters in this collection feature both challenges to and replies by the authors in Kuehnle and Connell s book making this an essential resource that moves the debate forward This book was originally published as a special issue of the *Journal of Child Sexual Abuse* *Final evaluation of the project "Conservation of biodiversity and mitigation of land degradation through adaptive management of agricultural heritage systems"* Food and Agriculture Organization of the United Nations, 2020-08-01 Morocco has a diverse and varied landscape as part of the Mediterranean basin Nevertheless the country s valuable biodiversity including the Atlas Mountains and its oasis systems is threatened 30 000 hectares of plant cover are thus lost each year in Morocco this has significant consequences on the various species that depend on this cover for their protection and creates a vicious circle Biodiversity conservation and mitigation of land degradation through adaptive management of agricultural heritage systems are a priority for the country To face these challenges between April 2015 and December 2019 the Global Environment Facility GEF with the contribution of the Government of Morocco through its multiple Action Plans the effective involvement of the technical units of the central regional and provincial Directorates of the Ministry of Agriculture Fisheries and Rural Development MAPM and Water and Forests MAPMDREF have implemented a project with the participation of the populations of the various communities concerned Project activities were carried out at five oasis sites The contribution of the project to the current political discourse on oases and the pioneering role in the use of Globally important agricultural heritage system GIAHS certification are important achievements However although the project appears innovative and timely its relevance could have been strengthened with a more balanced intervention logic in terms of its objectives and the duration of its implementation The project relies on GIAHS certification to achieve its objectives but due to delays with the project start up and the dispersed and isolated nature of the sites not all of the certification processes were successful despite being initiated This created disparities in opportunities Beyond the labelling of crops the project aimed to promote biodiversity integration into markets notably through organic farming However several activities remain incomplete compromising the project s effectiveness The

project suffers from poor communication both internally and externally As progress on the sites is uneven the sustainability of the project interventions is also uneven however the promotion of oasis cultures needs to be supported and sustained
