Towards a Psychophysiological Approach in Physical Activity, Exercise, and Sports Pedro Forte, Daniel Leite Portella, Diogo Monteiro, José Eduardo Teixeira, 2023-10-30 In recent years there has been an increase in interest in mental health disorders as a result of mediatic coverage of Olympic athletes mental health struggles and also due to the COVID 19 pandemic lockdowns These phenomena helped to further exacerbate a problem already extensively present in sport and society Therefore applying a psychophysiological approach to physical activity exercise and sports research has become very popular Indeed mental fatigue and mental disorders are not only psychological in origin but also require an explanation from a psychophysiological perspective due to the effective interconnection between the psychological and physiological dimensions Psychological variables can also influence performance and the psychophysiological system has a strong effect on the control of physical capacities Moreover pacing behaviour decision making self regulation and effort perception can also explain the role of the brain in physical activity and exercise management Thus the aim of this Research Topic is to share the impact of a psychophysiological approach in physical activity exercise and sports
