destruction of the local economy by the Japanese army the economic burden of running the resistance peasant ambivalence to revolutionary changes and the shortage of trained cadres Ultimately the movement spread too rapidly and too widely for the party centre to exert more than a very weak or mediated vanguard function outside scattered enclaves This in turn allowed localities an autonomous dynamic that often conflicted with higher party echelons Nevertheless the movement had a broad if highly uneven redistributive impact on power resources in the region leading to a structural fluidity that lowered the barriers to a future revolution History accelerated

Civil War in China Suzanne Pepper,1999-07-22 Many books have tried to analyze the reasons for the Chinese communist success in China s 1945_1949 civil war but Suzanne Pepper s seminal work was the first and remains the only comprehensive analysis of how the ruling Nationalists lost that war_not just militarily but by alienating the civilian population through corruption and incompetence Now available in a new edition this authoritative investigation of Kuomintang failure and communist success explores the new research and archival resources available for assessing this pivotal period in contemporary Chinese history Even more relevant today given the contemporary debates in Hong Kong and Taiwan over the terms of reunification with a communist led national government in Beijing this book is essential reading for anyone seeking a nuanced understanding of twentieth century Chinese politics
