Anderson,2020-02-24 Control and Resistance reveals the various ways in which food writing of the early Franco era was a potent political tool producing ways of eating and thinking about food that privileged patriotism over personal desire The author examines a diverse range of official and non official food texts to highlight how discourse helped construct and contest identities in line with the three ideological pillars of the regime autarky prescriptive gender roles and monolithic nationalism Official food discourse produced an audience with a taste for local foodstuffs and also created a unified gastronomic space in which regional cuisines were co opted for the purposes of culinary nationalism The author discusses a genre of official texts directed solely at women which demanded women s compliance and exclusive dedication to domesticity Alongside such examples Control and Resistance includes texts that offered resistance to the Franco hegemony Food texts have traditionally been viewed as apolitical because of their connections with domesticity so they were not subject to the same degree of censorship as other published works Accordingly food writing was at times more capable of offering disruptive or resistant textual spaces than other forms of discourse *The Provisions of War* Justin Nordstrom,2021-08-13 The Provisions of War examines how soldiers civilians communities and institutions have used food and its absence as both a destructive weapon

and a unifying force in establishing governmental control and cultural cohesion during times of conflict. Historians as well as scholars of literature, regional studies, and religious studies problematize traditional geographic boundaries and periodization in this essay collection, analyzing various conflicts of the nineteenth and twentieth centuries through a foodways lens to reveal new insights about the parameters of armed interactions. The subjects covered are as varied and inclusive as the perspectives offered, ranging from topics like military logistics and animal disease in colonial Africa, Indian vegetarian identity, and food in the counterinsurgency of the Malayan Emergency to investigations of hunger in Egypt after World War I and American soldiers' role in the making of US-Mexico borderlands. Taken together, the essays here demonstrate the role of food in shaping prewar political debates and postwar realities, revealing how dietary adjustments brought on by military campaigns reshape national and individual foodways and identities long after the cessation of hostilities.

Manly Meals and Mom's Home Cooking Jessamyn Neuhaus, 2003-07-28. From the first edition of *The Fannie Farmer Cookbook* to the latest works by today's celebrity chefs, cookbooks reflect more than just passing culinary fads. As historical artifacts, they offer a unique perspective on the cultures that produced them. In *Manly Meals and Mom's Home Cooking*, Jessamyn Neuhaus offers a perceptive and piquant analysis of the tone and content of American cookbooks published between the 1790s and the 1960s, adroitly uncovering the cultural assumptions and anxieties, particularly about women and domesticity, they contain. Neuhaus's in-depth survey of these cookbooks questions the supposedly straightforward lessons about food preparation they imparted. While she finds that cookbooks aimed to make readers, mainly white middle-class women, into effective modern-age homemakers who saw joy, not drudgery, in their domestic tasks, she notes that the phenomenal popularity of Peg Bracken's 1960 cookbook *The I Hate to Cook Book* attests to the limitations of this kind of indoctrination. At the same time, she explores the proliferation of bachelor cookbooks aimed at the man in the kitchen and the biases they display about male and female abilities, tastes, and responsibilities. Neuhaus also addresses the impact of World War II rationing on homefront cuisine, the introduction of new culinary technologies, gourmet sensibilities, and ethnic foods into American kitchens, and developments in the cookbook industry since the 1960s. More than a history of the cookbook, *Manly Meals and Mom's Home Cooking* provides an absorbing and enlightening account of gender and food in modern America.

Victory in The Kitchen, 2017. *Eating for Victory* Amy Bentley, 1998. Mandatory food rationing during World War II significantly challenged the image of the United States as a land of plenty and collapsed the boundaries between women's public and private lives by declaring home production and consumption to be political activities. Examining the food-related propaganda surrounding rationing, *Eating for Victory* decodes the dual message purveyed by the government and the media while mandatory rationing was necessary to provide food for U.S. and Allied troops overseas; women on the home front were also required to provide their families with nutritious food. Amy Bentley reveals the role of the Wartime Homemaker as a pivotal component, not only of World War II but also of the development of the United States into a superpower.
