Ecophysiology of Spiders Wolfgang Nentwig,2012-12-06 Recently another book on insect physiology was published It was restricted to a few focal points as are many of these new insect physiology books but there was considerable depth in its specialized point of view We were discussing the structure of this book and of insect physiology books in general when Prof Remmert asked me and what about books on spider physiology Silence Then I started to explain oh yes there is a congress proceedings volume on this topic and there is a group with excellent publications on another topic but I felt that this answer was weak One can no longer buy the proceedings volume in a bookshop and to read a series of publications on a given topic one must search in a library for a dozen journals Why is there not a single book on spider physiology comparable with the many books on insect physiology Are spiders a scientific ivory tower far from public interest and commercial importance I do not think so although spiders are one of the many forgotten animal groups which always grew in the shadow of the insects There are research groups working on spider physiology there are fascinating phenomena in this animal group and there are plenty of exciting results Spiders may have been always underresearched but research is progressing In the last few years new books have been published e g **Martes** Provincial Museum of Alberta,1997 In 1995 the University of Alberta hosted The Second International Martes Symposium an event that brought together scientists to discuss the state of knowledge about mammals of the genus Martes which includes martens fishers and sables Martes Taxonomy Ecology Techniques and Management is the proceedings of this symposium and is comprised of 31 technical papers on diverse aspects of these small carnivores The papers highlight research findings and the importance of the genus Martes to naturalists zoologists wildlife managers and foresters This book is a useful reference for researchers and members of the public interested in discovering more about the habits and conservation of martens fishers and sables
