sadness and perplexity and awe along with a roof over our heads He shows us how that works in examples ranging from a small Cape Cod cottage to the vast flowing Prairie houses of Frank Lloyd Wright from the Lincoln Memorial to the highly sculptural Guggenheim Bilbao and the Church of Sant Ivo in Rome where simple geometries create a work of architecture that embraces the deepest complexities of human imagination Based on decades of looking at buildings and thinking about how we experience them the distinguished critic raises our awareness of fundamental things like proportion scale space texture materials shapes light and memory Upon completing this remarkable architectural journey readers will enjoy a wonderfully rewarding new way of seeing and experiencing every aspect of the built world
