Working With Adults:

The Oxford Handbook of the Psychology of Working David L. Blustein, 2013-07-11 Researchers and practitioners interested in the role of work in people's lives are faced with the need for new perspectives to support clients, communities and organizations. This handbook is designed to fill this gap in the literature by focusing on the full spectrum of people who work and who want to work across the diverse contexts that frame working in the 21st century. **The SAGE Encyclopedia of Educational Technology** J. Michael Spector, 2015-01-29 The SAGE Encyclopedia of Educational Technology examines information on leveraging the power of technology to support teaching and learning. While using innovative technology to educate individuals is certainly not a new topic, how it is approached, adapted and used toward the services of achieving real gains in student performance is extremely pertinent. This two-volume encyclopedia explores such issues, focusing on core topics and issues that will retain relevance in the face of perpetually evolving devices, services and specific techniques. As technology evolves and becomes even more low cost, easy to use and more accessible, the education sector will evolve alongside it. For instance, issues surrounding reasoning behind how one study has shown students retain information better in traditional print formats are a topic explored within the pages of this new encyclopedia. Features: A collection of 300-350 entries are organized in A to Z fashion in 2 volumes available in a choice of print or electronic formats. Entries authored by key figures in the field conclude with cross-references and further readings. A detailed index, the Reader's Guide, themes and cross-references combine for search and browse in the electronic version. This reference encyclopedia is a reliable and precise source on educational technology and a must-have reference for all academic libraries. *Knowledge Management and E-Learning* Jay Liebowitz, Michael Frank, 2016-04-19 Examining the synergy between knowledge management (KM) and e-learning, this book considers KM practices, techniques and methodologies in e-learning. It explains how knowledge capture, retention, transfer and sharing can enhance e-learning. Edited and written by authorities in the fields of knowledge management and e-learning, the text includes case studies that illustrate applications in businesses, government agencies and universities in the U.S., Canada, Mexico, U.K., Europe and Asia. New-Church Messenger, 1914 *Higher Education and Job Employability* Betsy Ng, 2022-06-27 This book presents the most comprehensive discussion of emerging trends in higher education in the Asia-Pacific, ranging from graduate attributes to integrated workplace learning, with an in-depth focus on work readiness, employability and career development. It draws on the relationship between graduate attributes and employability, as well as vocational training or internship programs. It offers theoretical and empirical analyses that institutions, decision makers or academics can work on together to enhance job employability. This volume will also include issues such as development of emerging and employability skills, as well as directions for the changing nature in real-world settings. The book consists of contributions from experienced international authors offering detailed insights for those who want a timely understanding of the latest trends in higher education. **Transport and Mobility Futures in Urban Africa**

Ransford A. Acheampong, Karen Lucas, Michael Poku-Boansi, Chinebuli Uzundu, 2022-11-02 This book provides a collection of insightful conceptual and empirical works that situate transport and mobility challenges in the unique context of individual countries and cities while highlighting commonalities across the African continent. Written from an interdisciplinary perspective, the book covers important themes in transport and mobility, including the links between urbanization, urban structure, and accessibility; transport equity and poverty; non-motorized transport; public transport and the challenges and opportunities of new and emerging transport technologies and ICT-mediated mobility solutions. Each chapter engages with the normative imperatives that are critical to improving the transport and mobility situations of African urban areas now and in the future.
